Adaima III

Demographic and Epidemiological Transitions before the Pharaohs

Institut français d'archéologie orientale

Fouilles de l'Ifao 76 – 2017

Table of Contents

Foreword	IX
I. Introduction	1
I.1. <i>Context</i>	1
I.2. <i>The Anthropobiological Approach</i>	3
II. The Necropolis of Adaïma	9
II.1. <i>Introduction and History of the Excavations</i>	9
II.2. <i>Organisation of the Necropolis</i>	11
a. The West Cemetery	13
b. The East Cemetery	15
c. Conclusion	16
II.3. <i>Cases of Slit Throats</i>	17
a. Context	17
b. Description and Interpretation of the Cervical Vertebral Incisions	18
II.4. <i>Double and Multiple Burials at Adaïma and the Creation of the Necropolis</i>	23
II.5. <i>To View, Hide and Sanctify at Adaïma</i>	25
a. To View and Hide	26
b. The Secondary Burial and the Sacralisation of the Remains	27
II.6. <i>Discussions: Funeral Practices in Adaïma</i>	29
III. Paleodemography	31
III.1. <i>Introduction</i>	31
III.2. <i>Methods</i>	32
III.3. <i>The West Cemetery</i>	33
a. The Lederman Model Approach	33
b. The Estimator Approach	34

III.4. <i>The South Sector of the East Cemetery</i>	35
a. The Ledermann Model Approach	36
b. Ledermann Model Simulations	36
c. Discussion and Conclusion	38
III.5. <i>Complementarity Between the West Cemetery and the South Sector of the East Cemetery</i>	39
a. The Ledermann Model Approach	39
b. The Estimator Approach	41
III.6. <i>The North Sector of East Cemetery</i>	42
a. The Ledermann Model Approach	43
b. Ledermann Model Simulations	43
c. The Estimator Approach	45
d. Discussion and Conclusions	45
III.7. <i>Demography of the Adaïma Necropolis</i>	46
a. The Necropolis and Funerary Sampling	46
b. Prehistoric Demography	47
IV. Evolution and Morphological Affinities of the Adaïma Population	49
IV.1. <i>Context</i>	49
IV.2. <i>Materials and Methods</i>	50
IV.3. <i>Results and Discussion</i>	55
V. Pathology in Children	59
V.1. <i>Introduction and Methods</i>	59
V.2. <i>Perinatal Mortality and Dystocia Childbirth</i>	60
V.3. <i>Tuberculosis: Cases in the East and West Cemeteries</i>	61
a. The East Cemetery	62
b. The West Cemetery	66
V.4. <i>Non-Specific Infections</i>	68
V.5. <i>Trauma</i>	68
V.6. <i>Growth Disorders in Children and Adolescents</i>	70
a. Scoliosis	70
b. Spondylolysis	70
V.7. <i>Non-Specific Lesions and Stress Indicators</i>	70
a. <i>Cribræ Orbitalia</i>	70
b. Harris Lines	72
c. Endocranial Lesions	73
d. Periostitis	73
VI. Pathological Conditions in Adults	77
VI.1. <i>Osteoarthritis and Enthesopathies in the Adaïma Population</i>	77
a. Material and Methods	78
b. Prevalence of Osteoarthritis	79
c. Etiological Hypotheses of Osteoarthritis	81

d. Prevalence of Enthesopathies	83
e. Etiological Hypotheses of Enthesopathies	86
f. Comparisons and Discussion	87
VI.2. <i>Diffuse Idiopathic Skeletal Disease (DISH)</i>	88
a. Results	89
b. Discussion	89
VI.3. <i>Spondyloarthritis (SpA)</i>	90
a. Description	90
b. Discussion	94
c. Conclusion	95
VI.4. <i>Infectious Diseases</i>	95
a. Tuberculosis	95
b. Bone Abscesses	97
c. Spondylitis	97
d. Infectious Vertebral Processes	97
e. Maxillary Sinusitis	97
VI.5. <i>Traumatic Pathology</i>	98
a. General Data	98
b. Distribution of Traumatic Injuries	100
c. Comparison of the West and East Cemeteries	101
d. Conclusion	102
VI.6. <i>Oral Pathology</i>	102
a. Material and Methods	102
b. Representation and Preservation of Teeth	103
c. Antemortem Tooth Loss (AMTL)	104
d. Carious Lesions	106
e. Periapical Lesions	107
f. Discussion About Oral Pathology	108
VI.7. <i>Calcified Lymph Nodes and Bladder Stones</i>	109
a. Calcified Lymph Nodes.....	109
b. Bladder Stones.....	110
VII. The First Epidemiological Transition	113
VII.1. <i>General Context: Neolithic Demographic Transition and the First Epidemiological Transition</i>	113
VII.2. <i>Distribution of Bone Tuberculosis in Adaïma through the Predynastic Period</i>	113
VII.3. <i>Distribution of Bone Tuberculosis in Adaïma from Naqada IID to Naqada IIIB-IIIC and its Implications</i>	114
VIII. The Adaïma Necropolis, Palaeoepidemiology and the Predynastic	117
Bibliography	119
Authors and Affiliations	133
