Egypt and the Age of the Triumphant Prison: Legal Punishment in Nineteenth Century Egypt

In the nineteenth a legal system emerged in Egypt, that complemented the shari‘a. It was enforced by administrators and not by shari‘a courts. Criminal law was a prominent part of this system. As from 1829 criminal codes were enacted and from 1842 judicial councils were created to enforce them. An important element in this system was the notion of legality: the judicial authorities could only impose penalties by virtue of enacted criminal laws defining the offences and their punishments. Moreover, sentences should exactly specify the amount of punishment, which should be commensurate with the gravity of the crime. Thus a well-ordered and regulated system of legal punishment came into being, with capital penalty, corporal punishment and imprisonment with forced labour as its most important elements.

One of the most striking developments of the Egyptian penal system in the nineteenth century is the shift towards imprisonment as the main form of punishment at the expense of corporal and capital punishment. This is very similar to what happened in Western Europe and other regions during roughly the same period, which for that reason has been dubbed “the age of the triumphant prison”. In the following I will study the emergence and development of the Egyptian system of judicial punishments between 1829, when the first penal code was enacted, and 1882, the year the British occupied Egypt. I will compare these developments with those in the West and examine whether the theories advanced to explain the changes in the European penal system can help us understand what happened in Egypt.

In his study *Surveiller et punir: naissance de la prison* Foucault argues that there occurred in France around 1800 a marked change in the character of punishment. Corporal and capital punishment, i.e. punishment directed at the culprit’s body, enacted as a public

---

1 For a succinct survey of the criminal codes enacted between 1829 and the British occupation, see Appendix 2.
3 The term was coined by Perrot (1975), p. 81, who characterises the period between 1815 and 1848 in France as “l’ère de la prison triomphante”.
4 Foucault (1975).
spectacle on the scaffold, was replaced by punishment directed at the culprit’s mind and hidden from the public eye. The cruel spectacles of suffering, meant to serve as strong deterrents, were necessary in an age when few criminals were caught, owing to the lack of well organised police forces. Their replacement by imprisonment as the main form of punishment was, according to Foucault, the result of the emergence of a centralised state, capable of ensuring law and order by means of an efficient police apparatus. The near certainty of being caught replaced the deterrence instilled by spectacles of cruel executions and torture. The new form of punishment, Foucault argues, was aimed at disciplining the offender by subjecting him to a rigorous regime, to which end a centralised and hierarchical system of prisons was created. Prisons, along with schools, the army and mental asylums became disciplining institutions meant to create obedient subjects of the state.

In his study *The Spectacle of Suffering,* Spierenburg criticises Foucault’s ideas. He concurs with Foucault in that the nineteenth century saw the emergence of imprisonment as the ordinary mode of punishment and the decrease of capital and corporal punishment and that punishment ceased to be a public spectacle. However, his main objection to Foucault’s study is that the changes described by Foucault as having occurred in a rather short period of time, were in fact part of a process that lasted for more than a century, and that in many Western European countries imprisonment in houses of correction existed already in the seventeenth century. Other points of critique are that Foucault focused exclusively on France and that some of his examples used to show the prevalence of brutal public punishment, such as the execution of the French regicide Damiens in 1757, were exceptional and cannot be regarded as ordinary forms of punishing criminal offenders.

Spierenburg asserts that torture, corporal punishment and public executions disappear in Western Europe between 1770 and 1870. Until that period the standard punishment consisted in the infliction of pain, administered in public. This included the sufferings of the “chaînes”, the transport of galley convicts on their way to Marseilles and, after the abolition of the galleys, to the naval arsenals (*bagnes*). An important function of publicly administered punishment, according to Spierenburg, was to emphasise the authority and power of the state. For the changes in the modes of punishment that occurred during the late eighteenth and most of the nineteenth centuries Spierenburg offers two explanations: Elias’ “civilising process” (*der Prozess der Zivilisation*) and the strengthening and better integration of the Western European States. As a result of the “civilising process”, the sensibilities to officially inflicted pain increase. In the first phase, a growing aversion to the sight of physical suffering prompted groups among the elite to become advocates of penal reform. These endeavours were successful and mutilating penalties, the exposure of bodies after capital punishment and torture were abolished in most Western European countries during the second half of the eighteenth century. During the second phase, roughly the first half of the nineteenth century, the various social groups became...
better integrated in the nation State and began to identify with one another. The sensibilities to spectacles of suffering began to extend to the sufferings of other classes. This resulted in new attempts to reform the system of legal punishment. These attempts could succeed since States had become better integrated and therefore more stable. Therefore, the political authorities were not anymore in need of the deterrence produced by public executions and could respond to the new sensibilities by concealing punishment from the public eye. Imprisonment became the common penalty, capital sentences were increasingly executed behind prison walls and corporal punishments such as flogging and branding decreased in importance and were finally abolished in most countries. In order to explain why these changes in the penal systems of the various Western European countries occurred roughly in the same time and order, whereas centralised nation states did not emerge simultaneously, Spierenburg has recourse to the notion of a “European network of states”. In other words, he regards these developments not as related to the formation of separate states, but as a common European process.

The common element in these explanations is the emergence of centralised States. However, whereas Foucault sees the changes in the penal system as a direct consequence of the rise of a centralised, intrusive, and disciplining State, Spierenburg argues that the emergence of powerful and centralised States was a necessary condition for these changes to be successful but attributes them to changes in the mentality of the elites. In this essay I will argue, following Foucault, that penal reform in Egypt was in first instance a direct result of the centralisation of state power and the creation of an efficient apparatus of control of the population, of which the police was a part. However, contrary to Western Europe, the Egyptian prisons were not transformed into instruments of discipline. Imprisonment, like corporal punishment, was a mode of repression aimed at subjecting, not at disciplining the population. Disciplining activities of the State, especially during the first half of the nineteenth century, were directed at the State servants, both civil and military, and not at the population at large. That flogging and beating were abolished in 1861 cannot be explained, therefore, by the need for more effective disciplinary expedients, such as imprisonment. But it can neither be explained, as I will argue, by growing sensibilities to public suffering. Decisive were, in my view, the wish to modernise among important segments of the elite in combination with economic factors.

These aspects of nineteenth century Egyptian history, have hardly been the subject of scholarly research. This is partly the result of the nature of the available sources, which imposes serious limitations on the research of the penal system. To the best of my knowledge Egypt, unfortunately, lacks the richness of sources on the subject found in most Western European countries and consisting in official and press reports, diaries, and literary texts that may add liveliness and detail to institutional history. The only available sources are official documents with information on the institutional aspects, and only rarely

8 For the disciplining of the military, see Fahmy (1997).
9 The only studies known to me are Fahmy’s article on the medical conditions in nineteenth century Egyptian prisons Fahmy (2000) and Peters (forthcoming b).
on the experience of those who suffered punishment. These sources, regrettably, do not allow us “to construct the history of prisons from the inside out”, as a number of Western historians have done.  

My main sources, apart from published law codes and statutes, are official documents located in the Egyptian National Archives (Där al-Wathā’iq al-Qawmiyya, DWQ). Since at this moment only a very small part of all documents in the DWQ is accessible, it is likely that in the future other sources will be found that will hopefully fill in the gaps in our knowledge of the penal system. The sources I have used consist of unpublished decrees and Khedival orders, of correspondence between state authorities, and of sentences of the various judicial councils. In addition I went through some years of Al-Waqā‘î al-Miṣriyya, which summarily recorded the trials in the Divān-i Hidîvî. All this is supplemented by the scarce information that can be culled from the publications of contemporary Western travellers.

To the best of my knowledge there was no public debate in nineteenth century Egypt about penal policies, nor have I found express official statements laying down e.g. a philosophy of legal punishment or the principles of penal reform. What the rulers regarded as the objectives of and grounds for punishment can only be inferred from the preambles and texts of penal codes and decrees and from the wording of criminal sentences. Here we find brief references to some aims and justifications. The two mentioned most frequently are rehabilitation and deterrence. In the 1861 decree abolishing corporal punishment (see below) this is formulated as follows: “The aim of punishment is to teach manners (ta‘dîb, tarbiya) to those who have committed crimes, to prevent them from returning to criminal behaviour and to deter others.” In most sentences we find formulas like: “for his correction / for making him repent and as a deterrent example to others (adabun lahu / nadāmarun lahu wa‘ibratun li-ghayrihi).” That by “teaching manners” to the offender or “making him repent” some form of rehabilitation of the convict is meant, is corroborated by some articles in the penal codes that lay down that in certain cases repentance and improvement of conduct (hattat tasluh ḥâluhū / ḥâluhâ) are conditions for releasing a prisoner.  

The causal relationship between serving a prison sentence and repentance or improvement of conduct is somehow assumed and not made explicit. The same is true for deterrence. I have not seen any theoretical reflections on the matter. Protection of society is rarely mentioned, and then only as a justification for incapacitating penalties i.e. physical elimination or exclusion of the criminal through death or life sentences. That retribution, although not explicitly mentioned, was also important, is shown by the simple fact that the law codes lay down that more serious offences entail more severe penalties. That it is not referred to could indicate that it was so self-evident that nobody thought of mentioning it.

We are not well informed about the penal system before and during the early years of Mehmêd ʿAlî’s reign. There are reports that in the eighteenth century there were private prisons, due to the existence of various centres of power connected with Mamluk households.

---

10 See e.g. O’Brien (1982), who used the phrase “history from the inside out” (p. 9).

11 See e.g. art. 4 PC 1829 and ch. 1, art. 15 and ch. 2, art. 5, ch. 3, art. 13 QS.
It is not clear, however, whether these can be regarded as part of a system of law enforcement or rather as tools in the struggle for power between these households. There were also state prisons, run by prison wardens as concessions. We do know, however, that by 1829, a penal system was functioning based on death penalty, corporal punishment (essentially flogging and caning) and imprisonment, usually with hard labour. In that same year a central prison was created for convicts from all over Egypt. This was the notorious limán (or lîmän) Iskandariyya, named after the Turkish word for harbour (liman from Greek limén). It was part of the Alexandria Arsenal (tarsâna) and its establishment was prompted by the large scale construction works connected with the Alexandria harbour that had begun in the same year. It resembled very much the kind of hard labour prisons connected with naval arsenals existing in other Mediterranean ports, e.g. in France (bagnes) and Spain, that came into existence during the eighteenth century to replace galley service for convicts. During the 1840s transportation to the Sudan was introduced as a penalty for serious offenders.

In this essay I will focus on the three main elements of the penal system: capital and corporal punishment and imprisonment. I will not go into the function of the poorhouses, such as the Takiyyat Tülûn in Cairo, although these sometimes served as places of detention as mentioned in the Penal Code of 1845 (Al-Qânûn al-Muntakhab, henceforth QM). Their punitive function, however, was only marginal. There were also other penalties of minor importance, some of them expressly meant as supplementary punishments. I will mention them here for completeness’ sake, but will not elaborate. The QM introduced fining, the revenues of which were to be spent on the Civil Hospital (Al-Isbitâliyya al-Mulkîyya). Later codes, however, do not mention this punishment. The QM also introduced supplementary penalties adopted from French criminal law: those sentenced to long terms of forced labour had to be paraded in their regions carrying a sign on which the offences were written for which they had been convicted. Moreover, criminal sentences for serious crimes had to be publicised by posting placards in the main centres of the province. Other supplementary punishments were conscription after the completion of the prison term and, for non-Egyptians, expulsion to one’s country of origin. The latter measure was routinely applied, also in the case of non-Egyptian Ottoman subjects. Finally, some forms of punishment were reserved for officials: discharge and demotion, and detention in the office, with or without wages.
**Capital and Corporal Punishment**

**Capital punishment**

During the first decades of Mehmed ‘Ali’s reign, capital punishment was frequently applied, not only for murder and robbery, but also for rebellion, official negligence\(^{21}\) and recidivism.\(^{22}\) It was usually carried out by hanging (\textit{salb}) or, in case of military personnel, by the firing-squad.\(^{23}\) In accordance with Ottoman custom, those of high rank were beheaded or strangled with a bowstring.\(^{24}\) Women who deserved capital punishment were strangled\(^{25}\) or drowned in the Nile.\(^{26}\) During the first half of the 1830s execution by impaling or “by other barbarous means” were abolished (“excepting in extreme cases”).\(^{27}\) The deterrent effect of executions was regarded as an essential aspect of the punishment. A decree issued by the Diwan-i Hmidi in November 1834 laid down that those brought to death were to be left one day hanging from the gallows and that placards stating the name and the crime of the culprit had to be shown at the place of execution and all over the country in places frequented by people.\(^{28}\) Executions did not draw large crowds as they did in Western Europe. Even if they were carried out in market places, which was customary, those present there would continue with their business of selling and buying without paying attention to the spectacle.\(^{29}\)

Public executions were not only meant for deterrence, but also had a highly symbolic function as expressions of State power. As soon as he had established full control over all regions of the country, Mehmed ‘Ali wanted to leave no doubt that State authority and the monopoly of violence were vested in his person. Therefore, Mehmed ‘Ali enforced the rule in the early 1830s that executions needed his approval, barring emergencies such as open rebellion.\(^{30}\) Previously, the local governors could execute criminals on their own accord. Travellers report that the number of executions decreased during Mehmed ‘Ali’s reign because of greater public security brought about by a more efficient police force.\(^{31}\) This trend continued until the British occupation. Executions had become relatively rare by the middle of the century.\(^{32}\) The number of capital offences was small: the QM of 1845 mentioned only three capital offences: certain types of aggravated theft, arson resulting in loss of life and hiding runaway peasants. Manslaughter (\textit{qatl and}) would only be punished with death if the qadi pronounced a sentence of retaliation (\textit{qisas}). Robbery ceased to be a capital

offence in 1844.\textsuperscript{33} After the introduction of the Penal Code of 1849, which does not mention capital punishment at all, and the Imperial Penal Code (\textit{Al-Qānūnāme al-Sulţānī}, henceforth QS) around 1853, death sentences other than for manslaughter became extremely rare.\textsuperscript{34} Other incapacitating punishments, such as lifelong banishment to Ethiopia and transportation to the Sudan, both introduced in the 1840s took the place of capital punishment.

An additional factor that may have kept the number of executions low was the conflict between the Khedive and the Sultan about the right to ratify capital sentences, that arose during the negotiations about the introduction of the Ottoman Penal Code of 1850. The Sultan insisted that this was his prerogative, inextricably bound up with his sovereignty, whereas the Khedive wanted to retain a privilege that he and his predecessors had always exercised.\textsuperscript{35} Although there is no documentary evidence, it is possible that the Khedive, in order not to give new fuel to the conflict, instructed the judicial councils that he would not approve capital sentences except those sanctioned by qadis.

\textit{Corporal punishment}

During the early years of Meḥmed ʿAli’s reign, various types of corporal punishments were applied, of which flogging was the most common. Other forms existed too but were unusual. From the early years of Meḥmed ʿAli’s reign we have two pertinent reports by the contemporary chronicler Al-Jabarti. That he included these reports in his history is an indication of the exceptional character of the penalties mentioned in them. The first report is that in 1812 the governor of Cairo sentenced three robbers to the punishment of amputation of their right hands.\textsuperscript{36} This must have been an unusual penalty as is corroborated by Al-Jabarti’s remark that the executioner was not proficient in this operation, as a result of which one of the robbers died. The executioner’s lack of proficiency was no doubt a consequence of the infrequent occurrence of this type of punishment. The second report is about a market inspector (\textit{muhtasib}), a certain Muṣṭafā Kāshīf Kurd, who went around and punished those violating the market regulations by nailing them to the doors of their shops, piercing their noses and hanging pieces of meat from them, clipping their ears, sitting them on hot baking trays and so forth.\textsuperscript{37} These stories are often quoted as an indication of the cruelty and arbitrariness of justice in Meḥmed ʿAli’s time. Although these types of punishment reflect older Ottoman practices, they must have been exceptional in early nineteenth century Egypt, for otherwise Al-Jabarti would not have mentioned it. This is the more plausible since Muṣṭafā Kāshīf Kurd was appointed by Meḥmed ʿAli for his ruthlessness after he had heard that the lower orders of Cairo could not be made to obey Muṣṭafā’s predecessor.

As from the 1830 Meḥmed ʿAli followed a policy of putting an end to mutilating corporal punishments. When, in 1835, he learned that the governor of the Buhayra

\textsuperscript{33} Art. 197 QM.
\textsuperscript{34} After 1850 I have come across only one capital sentence. It was pronounced against a soldier who was convicted for having wilfully let escape a prisoner. See the document referred to in note 25.
\textsuperscript{35} See Baer (1969).
\textsuperscript{36} Jabarti (1879-1880), IV, p. 144.
\textsuperscript{37} Jabarti (1879-1880), IV, p. 278 (Ramaḍān, 1232 [July, 1817]); see also Lane (1966), p. 126, 127; Sāmī (1928-1936), II, p. 262, 542.
Province had cut off the nose and ears of a peasant who had uprooted cotton plants before finally killing him, he censured the latter and instructed him that flogging, imprisonment and death were the only punishments that he was allowed to impose for such acts, which was in accordance with the Penal Code of 1829. There is no evidence that mutilating hadd penalties or qisāṣ punishment for wounding were enforced. In the rare cases that lower courts pronounced such sentences, they were invariably commuted by higher authorities.

The only forms of corporal punishment mentioned in the laws issued in Meḥmed ʿAlī’s time were flogging with the kurbāj (with a maximum of 600 stripes) on the buttocks or the bastinado on the soles of the feet. Unlike the older Ottoman penal codes that would define offences but not their punishment, the Egyptian codes from 1829 specify the number of strokes. Flogging was the usual punishment in the countryside and the Code of Agriculture (Qānūn al-Fīlāḥa, henceforth: QF) of 1830 mentions it as a punishment in 31 out of its 55 articles. It was the preferred penalty to punish cultivators, since imprisonment would result in a decline in productivity. With regard to some offences, the application of the punishment of flogging depended on the social class of the offender: those belonging to the lower classes were to be flogged, whereas those of the higher classes were to be punished with imprisonment. This must reflect an explicit penal policy. The relevant provisions are part of a group of articles that are direct borrowings from the French Code Pénal of 1810, which does not list flogging as a punishment.

Under the influence of Ottoman criminal law, caning was introduced by the QS. The first three chapters of this Code, for the greater part identical with the Ottoman Criminal Code of 1850, meticulously followed the shariʿa provisions for taʿzir, in that the maximum number of strokes was not to exceed 79, one less than the minimum hadd punishment. However, in the chapters summarising previous Egyptian legislation (chapters 4 and 5), the traditional Egyptian system was maintained, except that the term kurbāj (whip) was now replaced by jālda (lash), a term used in the standard works of Islamic jurisprudence. The maximum number of stripes mentioned in the code was 250. Flogging or caning by way of taʿzir or as a hadd punishment could also be administered in a qadi’s court. From the archival material it is clear that if the qadi imposed such punishment, it was immediately carried out during the session.

---

40 QM art. 111 mentions this number as a punishment for officials committing for the third time the offence of returning late from an official journey.
41 QF art. 25 stipulates the liability according to the shariʿa of an official who causes the death of a person by hitting him on spots other than the buttocks or the soles of the feet. The technical term jālāq for bastinado, however, is not mentioned in the penal codes.
42 See Peters (1999b). In a few articles the number is not specified, probably due to editorial oversight. See e.g. PC 1849, art. 1: “an appropriate (corporal) punishment (al-ʿaʿzir bi-mī yuḥliṯ)”.  
43 See e.g. Khedival order of 16 Muḥarram 1252 [3-5-1836]; Sāmī (1928-1936), II, p. 466.
44 This is mentioned explicitly in various penal laws. See PC 1829, art. 9; QS, ch. 3, art. 19.
45 Art. 164 and 166 QM, corresponding with arts. 330 and 309 of the French Code Pénal of 1811.
Flogging and caning as judicial punishments were abolished in 1861. In order to put this in its proper perspective, it is necessary to discuss it in the context of official violence. During the nineteenth century acts of violence committed by officials against the population were frequent and common. We can distinguish the following forms:

- generic official violence in situations where officials needed to assert their authority and force persons to carry out their orders (army, civil servants supervising corvée, collecting taxes etc.);
- physical pressure during criminal investigations;
- judicial corporal punishment based on sentences pronounced by qadis, councils, or officials with judicial powers.

From the middle of the nineteenth century the Egyptian government made attempts at controlling and limiting generic official violence. The motives behind these measures were diverse and I will discuss them in the conclusions. The first steps in limiting official violence were taken by Mehmed ‘Ali who enacted legislation making officials financially and criminally responsible for excessive violence resulting in loss of life and for unlawful detention. This was part of his policy of curbing the arbitrary behaviour of his administrators and soldiers and to inculcate discipline into them. However, these measures were not intended to put an end to generic official violence and it remained a common phenomenon: tax collection in the countryside was usually accompanied by the whipping of those unwilling or unable to pay until at least the end of the 1870s.

Until the early 1850s, torture (al-tadyiq ‘alâ al-mathûm) during investigation was standard procedure, sanctioned by state law although not by the shari’a. It consisted as a rule in flogging and beating, often on the soles of the feet. Other forms of torture were forcing people to stand for 48 hours until their feet were swollen, depriving people from food, drink and sleep, confinement in too small a cell, hanging a person from his fingers and the use of shackles. When the QS was introduced in the early 1850s, one of the organic decrees issued in connection with the QS banned the use of physical pressure during criminal investigations.

46 For liability of officials for death caused by flogging, see Khedival order, 28 Rabî’ II 1245 [27-9-1845], i.e. before the enactment of Mehmed ‘Ali’s first criminal code, to the effect that officials who would cause the death of persons by beating would be liable according to the shari’a and also face banishment; the order was occasioned by a report that a ma’mûr in the Gharbiyya province had beaten to death some persons. Sâmi (1928-1936), II, p. 356; see further: QF art. 25; QM art. 60; PC 1849 art. 46; QS ch. 1, art. 1.

47 Officials who unlawfully imprison persons must pay a compensation of 5 to 10 piaster per day: QM art. 179; PC 1849, art. 34. The provisions were not adopted by the QS.

49 QF, art. 26; Dinâr-i Hidvî Lâyîshî (Regulations of the Khedival Bureau), issued 13 Muḥarram 1254 [8-4-1838], art. 13. Text in Maḥfaẓat al-Mîhi, doc. 20. See also Lane (1966), p. 114.

50 During the investigation of case of manslaughter the suspects had been beaten severely and finally confessed considering that being sent to the Alexandria gaol was better than continuously being whipped. The Grand Mufti stated: “The defendants cannot be convicted for manslaughter because their confessions have been obtained by what according to the shari’a is regarded as coercion (ikræh sharî).” Fatwa, 5 Jumâdæ II 1268 [27-3-1852]. Al-Mahdi (1301 H.) v, 435-6.

51 Some of these forms of torture were routinely mentioned in official correspondence about criminal investigations. See e.g. Mudîriyyat Minºfiyya to wakîl Qism Samædºn, 6 Dhû al-Qa’dâ 1260. Mudîriyyat Minºfiyya, Sâdir, Lám 6/1/1, p. 209; Mudîriyyat Minºfiyya to al-Imamyya al-Haqqânîyya, 5 Dhû al-Qa’dâ 1260, ibid., p. 254. Others are listed in the 1861 decree abolishing corporal punishment and torture (see below).
investigation. The prohibition was repeated in 1858 and in 1861, when, in the decree abolishing flogging as a penalty (see below), instructions were issued regarding the extent of pressure to be applied on suspects during the investigation. It prohibited certain methods of torture and stipulated that the mudir or ma'mur of the department where the investigation was carried out was to supervise the interrogation.53 Beating during investigation was henceforth allowed only in exceptional situations as a means to induce a suspect to confess if there was already some evidence for his crime. In such a case he could be beaten but only if after some days of trying, it proved to be impossible to make him confess by psychological pressure, such as verbal abuse (zajr), threats (tahdid, takhwif), and showing the whip.54 It is of course not clear to what extent these instructions were obeyed in practice. There are records of complaints of suspects who claimed that their confessions were obtained under physical pressure. These were taken seriously and resulted in official investigations.55

Whereas the banning, or rather, the restricting of violence during investigation was a gradual process that lasted nearly ten years, the abolition of flogging as a punishment was brought about at once, although previously certain measures had already been taken to restrict excesses: In 1858 it was decreed that if a punishment of more than two hundred lashes was to be carried out, the victim should first undergo a medical examination.56 The penalty of flogging or caning was finally abolished on 9 July 1861. The decree is silent on the considerations for this step. Flogging was henceforth replaced by detention (habs), which could be aggravated, for serious offenders, by providing only water and bread for food (habas al-riyada), by putting them in shackles, or by isolating them from the other inmates and denying them the right to receive visitors.57 The decree was enforced by the courts, although in the years immediately following the decree, I have seen a few sentences imposing flogging, most of them pronounced by shari'a courts by way of ta'zir.58

52 See art. 14 Dhikr waqâìf mutafarri'a bi-l-majlis (List of further duties of the regional councils), an organic decree enacted when the QS was introduced, forbidding torture (ta'dhib), suffering (adhâyya) and physical pressure (tadyiyya) during investigations, Jallâd (1890-1892), II, p. 105-106; Khedival decree of 9 Ramadân 1274 (24-4-1858), Majlis al-Ahkâm, Daftar Majmû' Umûr Jinîyya, p. 90.

A year later, in an instruction to newly founded regional courts, the interdiction of flogging was repeated. Irâda Sânîyya of 22 Dhû Qa‘da 1278 [21-5-1862], Sâmi (1928-1936), 3/1 p. 403.

**Imprisonment**

“In 1855 a certain Muḥammad ‘Ali was arrested on a charge of theft. In his home goods were impounded that he was accused of having stolen. Their owner, Muḥammad Rif’at Efendi, living in the Cairo Bāb al-Khalq quarter, accused him of having stolen money and goods from his home with a total value of about 18,000 piasters. Muḥammad ‘Ali declared that the victim’s wife, with whom, he claimed, he had spent a day and a night, had given him out of her own free will a sum of money, part of which he had spent on the goods that were impounded in his quarters. The police recovered the price of the goods from the seller and returned it to Muhammad Rif’at Efendi, together with the rest of the money that in the meantime had been found in Muḥammad ‘Ali’s lodgings. At this point the suspect had admitted that he had stolen the money. When his criminal records were examined, it appeared that he had been arrested twice before, once on a charge of theft of a camel –of which he later was proven innocent–, and once for pretending to be a police spy (bassās). Both times he had managed to escape from custody. Taking this into consideration, he was sentenced to lifelong forced labour in the fortifications of Al-Qanāṭir al-Khayriyya (also called Al-Qal‘a al-Sa‘idiyya). Later he was transferred to the Alexandria Arsenal Prison (Līmān Iskandariyya). In 1858 he was selected to serve the remainder of his term in the army. There, however, he committed another theft and was sent back to the Alexandria Arsenal. When the general amnesty of March 1861 was announced, he was not released, but, being regarded as incorrigible (shaqī), transferred to the Department of Industry (Diwān al-Wāḥārūt wa-l-‘Amaliyyāt) for forced labour in factories. From there he escaped again. Upon being found out by a police spy, he tried unsuccessfully to prevent his arrest by threatening the police spy with a knife and wounding a person who came to the policeman’s rescue. On 16 September 1861, the Cairo Police Department sent him to the Alexandria Arsenal in order to complete his life sentence. However, when Khedive Ismā‘il succeeded Sa‘id, he instructed the Ma‘lis al-‘Ākhām (the highest judicial council in Egypt) to review the cases of inmates of the Alexandria Arsenal with life sentences or unspecified terms. As a consequence, his sentence was commuted on 19 November 1866 to five years forced labour in the Alexandria Prison. However, since he was classified as belonging to the “group of evildoers” (zumrat al-ashhrār) mentioned in ch. 3, art. 13 of the QS, he was not to be released after this period unless it had become clear that he had become honest and of good behaviour and he could find a relative willing to be his guarantor (dāmin).”

My first reaction upon reading this account was one of regret that this gaolbird did not write his memoirs. He was familiar with most larger prisons in Egypt and the story of his life behind bars would be invaluable for the penal history of Egypt. The account as we

9 Sin 7/10/29, Majlis al-‘Ākhām, al-‘Ādābīt al-sādira, p. 135-136; madhata 133, 11 Rajab 1282 [30-11-1865]; Khedival order to the Ministry of the Navy (under whose jurisdiction the Alexandria Arsenal camel), 21 Rajab 1281 [20-12-1864], Sin 1/1/30, Ma‘ṣūma Ṣan‘īyya, al-‘Aqāmīr al-sādira, p. 90 and 121; Cairo Police to Muhāfaẓat Iskandariyya, 12 Rabī‘ I 1278 [17-9-1861], letter by which Muhammad ‘Ali was sent to the Alexandria Arsenal, Diwān ‘Āmil al-‘Āqālim, Lām 2/2/5 (old 530), p. 24, no. 7.
have it is representative of the type of available sources. They are factual and written from an official point of view. Their value lies in the information they impart regarding the functioning of the penal institutions, and they tell us little about the experiences of the inmates. 

The story of Muḥammad ʿAlî illustrates several characteristic traits of the Egyptian prison system in the nineteenth century. In the first place it is evident from the account that there were a variety of penitentiary institutions and that, in addition, convicts were sometimes sent to the army instead of completing their sentences in prison. Secondly, the account shows that the term specified in a sentence could be subject to all kinds of changes. The period one actually spent in prison was often shorter than the term of the sentence, usually as a consequence of general amnesties, but also as a result of escapes. Prison security was not very tight and escapes were frequent in spite of the severe punishments to which guards were sentenced if they let prisoners escape. Finally, it demonstrates that attempts were made, although not very consistently, to single out habitual offenders and keep them permanently imprisoned. In the following I will discuss these and other aspects of the Egyptian prison system. 

The functions of prisons

Prisons had various functions: In the first place they served as penitentiaries, i.e. places of confinement for those sentenced to imprisonment. In addition, the police prisons and in the prisons of the provincial capitals held arrested suspects in custody pending the investigation of their cases. In exceptional cases, this might take a long time. I found a petition submitted by a murder suspect, who had been in custody for over seven years, because the victim’s heirs could not be traced with the result that the shari’a proceedings could not be initiated. Most prisons also served as debt prisons. Debtors unable to pay their debts were normally held in the local prisons. During Mehmed ʿAlî’s reign they were sent to the Alexandria Arsenal Prison if they proved to be insolvent. In Cairo and possibly in other big cities there was a special debt prison. It seems that it was not too difficult to have a person imprisoned on this ground, for in February 1869 a decree was issued to remedy the frivolous arrest of debtors. It stipulated that persons could only be imprisoned for debts if these were duly substantiated and the creditor was willing and capable of paying for the prisoner’s maintenance.

63 In classical Islam, this was the most important function of prisons. See Schneider (1995).

64 Sin 2/29/2, Divān Khiḍīwī, Sādir al-aqālim, p. 43, doc. 14, 21 Dīq, 1243.

Other groups of non-criminal inmates were persons punished vicariously for acts committed by their relatives and persons, often Bedouin, held in hostage by the government as a means to coerce their relatives or tribe into obedience. Vicarious punishment seems to have disappeared after the 1850s. With regard to the imprisoned Bedouin, it is sometimes difficult to distinguish between those who were imprisoned for robbery or rebellion and those who had been taken hostage as a guarantee for the good behaviour of their tribes. I regularly came across Khedival orders instructing prison commanders to submit lists of the Bedouin inmates and to specify whether they had been imprisoned for a certain period or without a term. During certain periods, e.g. in the 1860s, the Alexandria Arsenal also served as a place of imprisonment for foreigners who had been sentenced to imprisonment by their consular courts. They as a rule served short sentences, of a few weeks only.

Almost all prisoners had to work. Many of them were attached to factories or quarries to supplement the numbers of the “free” workers, many of whom could hardly be distinguished from the convicts, having been brought by force to the industrial establishments. Moreover, as is clear from the aforementioned account of Muhammad ‘Ali, young convicts who were physically fit, often served their terms as soldiers in the army, or were drafted immediately after the termination of their terms. Prison labour had essentially an economic function as a means to provide manpower for necessary but arduous, dirty or unhealthy work. Since especially in the early half of the nineteenth century there was a chronic factory workers and soldiers, prisoners were matter-of-factly sent to industrial establishments and the military. I have found no indications that prison labour was seen as a means to rehabilitate the inmates, which occupied such a prominent place in nineteenth-century Western European debates on crime and punishment. Within the framework of penal policy, hard labour was regarded as a form of retribution. In addition it functioned as a deterrent since the inmates were not isolated from the public space and could be seen in shackles during transport or when carrying out work outside the prison.

67 Majlis Mulki to the Ma’mur al-Dawâîn, 26 Rabi‘ II 1246 [14-9 1830], ordering that local officials must take the sons of peasants who are unable to pay their taxes and send them to the army if they are strong, or to the Alexandria Arsenal or the Tarâf al-Ma’sâra in order to carry earth if they are weak. Diwân Khidîwî Turki, 739 (old), p. 102, doc. no. 209. Khedive to Ahmad Pasha al-Yegen, 12 Šafar 1248, Ma’yya Saniyya Turki 44 (old), doc. 91.

68 See e.g. missive from Wakil Nâzîr al-Jihâdiyya to Ma’yya, 8 Muharram 1272 [20-9-1855] mentioning that apart from the ordinary prisoners, there were 609 Bedouin in the Qal’a Sâ’dîyya, Ma’yya Turki, Maḥzaza 8, waraqâ 11, doc. 58 (from DWQ card index, s.v. sujin); Khedival order to the Diwân ‘Umûm Bahriyya Iskandariyya, 3 Jumâdâ II 1272, ordering the release of 71 Bedouin from the Alexandria Arsenal at the request of their sheikh, Ma’yya Saniyya, Awâmîr, Daftar 1884 (old), p. 49, doc. 28 (from DWQ card index, s.v. sujin); Entry to Alexandria Prison on 19 Rajab 1279 [3-1-1863] of 82 Bedouins from Upper Egypt, called ‘ubûd ashqiyâ’ (criminal Bedouin), aged between 10 and 70, without specification of prison term, Diwân al-tarsana, sijill 954 (register of prisoners in the Alexandria Arsenal), p. 131.

69 See e.g. Khedival order to the commander of the Qal’a Sâ’dîyya, 5 Jumâdâ II 1272 [12-2-1856], Ma’yya Saniyya, Sâdir al-awâmîr al-šâlîya, Sin 1/1/5, p. 144, no. 20; same order to Alexandria Arsenal, 25 Jumâdâ II 1272 [3-3-1856], Ma’yya Saniyya, Sâdir al-awâmîr al-šâlîya, Sin 1/1/5, p. 70, no. 29.

70 See e.g. Diwân al-tarsana, 956 (old) (Register of prisoners of the Alexandria Arsenal), p. 14.

71 That offenders could be sent to the army as a punishment is mentioned in the oldest criminal legislation: e.g. PC 1829 arts. 18-20, QF arts. 15, 7 and 27, PC 1849, arts. 8 and 11. Although it is not mentioned in the QS, the practice of sending convicts to the army continued.
Types of prisons

In order to get an insight in the type of prisons that were operative in Egypt during our period, we have to rely on archival sources and on the earliest Egyptian legislation (i.e. the Penal Code of 1829, the Code of Agriculture of 1830, and parts of the Penal Code of 1845). The texts of the other penal codes are often misleading since their terminology was copied from the foreign models that had inspired these codes and did not necessarily reflect the Egyptian system. This is especially true with regard to arts. 123 to 194 of the QM, that were translated from the French Penal Code of 1811 and of the first three chapters of the QS that corresponded with the Ottoman Penal Code of 1850. Moreover, the terminology used in the various codes was not uniform: sometimes the same term is used for different modalities of imprisonment, whereas in other instances the same modality is referred to by different terms.

Although the names and locations varied, the essential traits of the system hardly changed during our period. Serious offenders were sent to national labour prisons or, from the early 1840s, deported to labour prisons in Sudan. For those whose offences were not as serious, there was the possibility to serve prison terms at forced labour locally in factories, on building sites or in menial jobs in government offices. Since the convicts were closer to their homes, this was considered to be a lighter form of punishment. Those sentenced to short terms were held locally, in police gaols in the big cities or in gaols in the provincial capitals.

At the national level there were at various times three prisons. The one that remained operative during our entire period was the one connected with the Alexandria Arsenal (Tarsînât Iskandariyya), called li'mân (or lûmân) Iskandariyya, where the convicts were originally employed in spadework and transporting earth and later also in the workshops. In the 1830s the inmates were paid wages for their labour. This prison fell under the jurisdiction of the Department of the Navy (Dîwân al-Donanma or Dîwân al-BaÌriyya). The overall responsibility, according to art. 197 QM, was with the Inspector of the Navy (muftâtîsh al-Donanma) and the Director of the Arsenal (Nâzîr al-Tarsâna). For its daily functioning, the prison warden (ma'mûr al-mudhnîn) was responsible. The number of the inmates of the Alexandria prison fluctuated between 200 and 650. In the early 1830 Bowring counts about 200 prisoners (among several thousands of non-convict workers) in the Alexandria Arsenal. This number must have been practically constant until 1845, when a...
French traveller estimated the total number of prisoners in Cairo and Alexandria together at 300 inmates.\(^{76}\) A few years later, however, in 1847, there were already about 450 prisoners in Alexandria. In the early 1860s the number of inmates varied between 250 and 650 convicts.\(^{77}\) The fluctuations can be explained by changes in penitentiary policies, i.e. variations in the categories of prisoners that were sent to Alexandria and by general pardons, ordered especially when the prisons became overcrowded.

Apart from the Alexandria gaol there was a forced labour prison near the fortification at al-Qanātir al-Khayriyya (called al-Qal’a al-Sa’idiyya or al-IstiIkāmāt al-Sa’idiyya) that was operative from about 1853 until at least 1865.\(^{78}\) Its inmates worked in constructing the fortress. As a prison it was much bigger than the Alexandria Arsenal. In October-November 1855, it housed some 1,100 to 1,200 prisoners, half of them Bedouin, and the wardens repeatedly complained that they did not have sufficient personnel at their disposal for guard duties.\(^{79}\) Initially it fell under the authority of the War Office (Jihādiyya), but in 1857 it was transferred to the Department of Industry.\(^{80}\) Finally there seems to have been a national prison in Sudan (apart from the deportation camps). In the beginning it held only Sudanese convicts until, in 1857, it was decided that, in order to make the punishment more deterrent, serious offenders from the Sudan would serve their terms in Alexandria, whereas those from Egypt would be sent to the Sudan.\(^{81}\)

The provincial prisons and various industrial establishments held less serious offenders sentenced to hard labour. Hard labour in factories and on construction sites goes back to the late 1820s, when convicts were sent to the iron foundry (Turkish: demürkhane) in Bulaq or to building sites in Alexandria (Turkish: Iskenderiye ebniyesi). Apparently there was at that time no differentiation in the various forms of hard labour. In the 1830s and 1840s prisoners were either put at the disposal of the Department of Construction (Dîwān al-Abniya) or sent to the Alexandria Arsenal. Later the Alexandria Arsenal became the prison for the more serious criminals. In the early 1850s convicts were sent to various industrial establishments (tarsāna), such as the ones in Bulaq\(^{82}\) and Khartoum, (until the latter, as we

\(^{76}\) Schoelcher (1836), p. 30.

\(^{77}\) This breaks down as follows: 1847: 450 inmates; 1860: 600 inmates; 1865: 400 inmates; 1866: 650 inmates; 1868: 250 inmates. I have found these figures with the help of the five sijills concerning the Alexandria Arsenal (see Appendix 3), by counting the number of prisoners that entered in a given year and multiplying it with the average period spent in the prison. These figures are confirmed by a source stating that on 4 December 1862 the number of inmates was 443. See Majlis al-AÌkæm, al-Ma∂æbi† al-∑ædira, Sîn 7/10/23, no. 893, 28 Dhº al-Qa©da 1280, p. 132.

have seen, became a national prison in 1857). Finally, from the mid 1850s until late 1864, convicts were put at the disposal of the Department of Industry (Diwān al-Wābūrāt wa-l-ʿAmaliyyāt, also called Diwān al-Fābriqāt wa-l-ʿAmaliyyāt) to be used as a labour pool for work in factories and quarries.

Hard labour in provincial gaols existed already in 1830. It is defined in the Law of Agriculture enacted in that year, as “to be employed, with his feet in chains, on the government building site (al-abnīya al-māriyya) in the district (maʿmūriyya) where he comes from” (art. 17). The Penal Code of 1845 mentions expressly that these building sites are located both in Cairo and in the provincial centres (art. 192). Since this type of hard labour served not too far from home, it was considered to be lighter than terms served in the national prisons. The QS referred to it with the term “lowly jobs (khidamāt danīʿa or ashghāl sufliyya).” Convicts serving time in the provincial prisons were employed in sweeping, cleaning and light construction labour. This type of punishment was less strenuous than hard labour in factories.

Places for simple detention (ḥabs) were the police prisons in the big cities, the prison in the Cairo Citadel, and prisons in the various provincial capitals. These prisons fell under the authority of the local police departments or the provincial administrations (mudīriyyāt, muḍīfa-ṭūbūt). They were relatively small: In August 1859, about 100 prisoners were detained in the Cairo police gaol, among them those held for debt. The provincial prison of the Mudīriyya Beni Suweif and Fayoum housed 74 inmates in 1854. For higher officials and military officers there was detention in the fortress of Abū Qīr, which was in use until at least 1855. I have not been able to establish whether or not the detainees were forced to work. For some time after 1849 it was replaced by imprisonment in Aswan, with a reduction of half of the prison term because of the heat.

As we have seen, prisons fell under various departments: Ministry of War, of the Navy, and of Construction, the various police departments (dabṭiyya) and under the authority of the city administrations (mudīriyyāt) and the provincial administrations (mudīriyyāt). Therefore, the organisation of the prison system was diverse. A small measure of
uniformity was introduced by the appointment of a special inspector of prisons in February 1865, with the task of checking the conditions of the prisons and ensuring the punctual release of the prisoners.  

**Transportation**

Transportation to the Sudan was regarded as the most serious form of imprisonment. We do not have any details of prison life there, but the climate, the distance from home and the working conditions must have made life very hard for the inmates. Transportation was introduced as a means of incapacitation of serious criminals by means of total exclusion from society, and thus as an alternative for capital punishment. Economic considerations played a role in its introduction. Prisoners had to work in those areas where free workers were not available: in the gold mines and quarries in Eastern Sudan and, later, in the reclamation projects in Central Sudan. In the end, however, the authorities realised that prison inmates were not very efficient and productive workers. By then it was decreed that those deported to the Sudan could work in agriculture as free labourers and had to support themselves by their own labour. The only restriction to which they were subjected was that they were forbidden to return to Egypt.

During Mehmêd ’Ali’s reign, there were three modalities of transportation. The first one was perpetual banishment from Egyptian territory. This was introduced in 1846, for those with life sentences. They were to be sent via the Sudan to Ethiopia, out of reach of the Egyptian government ("jihat al-İabash allatî hiya khārija ‘an sūrat al-hukūma bi-ţariqat al-Sūdān"). This order, which was indeed enforced, was revoked in March 1852, when the Majlis al-Ahkâm decreed that henceforth convicts with life sentences were to be sent to Jabal Qisân. The other modalities were deportation with forced labour in mines and quarries, and deportation to reclamation areas.

When deportation was first introduced as a punishment, the convicts were sent to a mountainous area in the Sennâr Province on the upper Blue Nile near the Ethiopian border, where they had to work in gold mines and stone quarries. The most notorious labour camp was located in Fayzoghli, but there were other camps as well, notably in Jabal Qisân and, more to the East, Jabal Dûl, which was located on Ethiopian territory. Fayzoghli is mentioned for the first time in the version of the QM printed in 1845. By then it had become the normal destination for those convicted for embezzlement, theft, manslaughter, robbery, false testimony and forgery, even for relatively short terms of six months. Before that time it was already in

---

92 See note 98.
95 The QM incorporated previous legislation such as the Qânûn al-Filâha of 1830 and the Qânûn al-Siyâsatnâma of 1837. Several articles of these laws as included in the QM impose deportation to Fayzoghli as a punishment, whereas the original versions of these laws do not mention it. Therefore, deportation to Fayzoghli must have been introduced between 1837 and 1845.
96 QM art. 201.
use as a place of exile for political opponents. On 9 February 1846 (12 Safar 1262) Mehmed ‘Ali decreed that those sentenced to two years or more of hard labour, were to be deported to the gold mines (i.e. Fayzoghli and environment). This order was not consistently enforced until 1848, when, at the instigation of the Jam‘iyya Haqqâniyya (the highest judicial council and predecessor of the Majlis al-Ahkâm), serious offenders were indeed sent to the Jabal Dül and Jabal Qîsân labour camps. Between 1863 and 1865 Fayzoghli and the other labour prisons on the Blue Nile were closed. As from 1865 prisoners with sentences longer than ten years were to be deported to the White Nile area in the Sudan.

The third modality of deportation to the Sudan was hard labour in agriculture. This was introduced in 1844 as a special punishment for officials guilty of embezzlement. As from 1857, peasants and rural sheikhs sentenced to five years or more for manslaughter were deported to land reclamation areas in the Khartoum Province and could be accompanied, on a voluntary basis, by their families. They were not to be detained, but had to work as free labourers. One year later, this was extended to persons convicted for theft for the fourth time. When these convicts and their families began to arrive in 1858, the Sudanese officials were at a loss. To be on the safe side, they imprisoned everybody and wrote to the Ministry of Interior for instructions. The query was referred to the Majlis al-Ahkâm, who had originally drafted the decree. The Majlis al-Ahkâm explained that those sentenced to banishment according to this decree were free to go anywhere in the Sudan and seek their livelihood in whatever way they wanted and that their families had accompanied them voluntarily. Therefore, they all had to be released and the government was not obliged to support them.

**Differentiation**

**As to gender and age**

Male and female inmates were housed in separate prisons. In Mehmêd ‘Ali’s time, women in Cairo were held in a special prison called Bayt al-Wâlî and in a women’s prison connected with the shari‘a court in the capital. Around the same time, in the early 1830s,
a women’s prison was created in Alexandria. Before that time, women in Alexandria were not imprisoned but were given corporal punishment instead.\(^{108}\) Local police prisons also had sections for women. The one in Cairo was moved to a newly rented house in 1860, because it was too close to the men’s prison.\(^{109}\) Where women were detained in the provincial centres is not clear. In view of the strict separation between men and women elsewhere, there is no doubt that they were confined in different localities.

Women were also sentenced to forced labour under the supervision of the Department of Construction (diwān al-abniya).\(^{110}\) Here the conditions left much to be desired. In 1850 it was discovered that at some places men and women not only worked together, but also had to spend the night in the same wards. When this became known, the authorities immediately ordered this to be remedied.\(^{111}\) In special cases, for instance if they had to take care of small children or were pregnant, women were not sent to factories or building sites, but were allowed to serve their terms in the civil hospital.\(^{112}\) Women convicts were never sent to the Alexandria Arsenal or the Sudanese labour camps. In 1856, a national prison for women sentenced to forced labour was established in a spinning mill (Turkish: iplîkhâne, Arabic: maghzal) in Bulaq.\(^{113}\) This must have been the result of the introduction of the QS, which, following the Ottoman Penal Code of 1850, lays down that women are to be detained in a women’s prison (ch. 2, art. 22).

There is no evidence that there were special reformatories for juvenile delinquents. This in spite of art. 133 QM (corresponding with art. 66 of the French Penal Code of 1811), stipulating that boys of twelve years and older, not possessed of discretion (ghayr mumayyiz), shall not be punished as adults, but be detained in a reformatory (mahall al-tarbiya) for a period to be determined by the government or be handed over to their parents. Most prisoners in the Alexandria Arsenal were at least seventeen years old, but I came across some instances of younger boys,\(^{114}\) even younger than twelve years, the statutory minimum because she is pregnant and has a baby that she is still breastfeeding. Majlis Misr, 3 Safar 1272 [15-10-1855], Muhâfazat Misr, Lâm 1/20/1, p. 2, no. 5: woman condemned to serve in the civil hospital.

\(^{108}\) See e.g. (all taken from DWQ card index s.v. sujûn): Khedival order of 8 Muharram 1272 [20-9-1855], to Mudīrīyya Miṣrīyya, Na‘īm al-Din, 1/55/2 (1248-1249), p. 108. [496].

\(^{109}\) Khedival order to the Nazîr Majlis Islândariyya, 11 Jumâdâ 1 1249 [6-10-1832], instructing him to find a place where women can be imprisoned in the same way as in Cairo and to provide for their maintenance. Sin 1/55/2 (1248-1249), p. 108. doc. 496.

\(^{110}\) Khedival order to the Muḥâfazat Miṣr, 23 Shawwâl 1277 [4-5-1861] to rent a house for 50-75 plasters to serve as a women’s prison and appoint a guard with a monthly wages of 150 plasters, because the existing women’s prison in the Police Department (Da‘bîyya) is too close to the men’s prison. Ma‘yâya Sanîyya, Daftar 1894 (old), Awâmîr, p. 125, doc. 65 (from DWQ, card index s.v. sujûn).

\(^{116}\) Al-Jam‘îyya al-Îaqqæniyya, Qayd al-khulæÒæt al-∑ædira ilæ 112. [8] A woman is sentenced to serve two years in the civil hospital (isbahîliyya mulkiyya) assisting the sick,
age for criminal responsibility. Such boys were usually put under the care of one of the foremen of a workshop for learning a trade, and special arrangements were made for their lodgings. Occasionally I have found petitions of parents requesting the release of their minor children.

Arts. 134 and 135 of the QM, following French law, lay down that persons of seventy years and older shall not be sentenced to a term of hard labour or to deportation for life and that the punishment of persons who reach that age while serving a sentence of forced labour shall be commuted to incarceration (al-raḥt bi-l-qal‘a) with the possibility of a reduction of the term. The QS is silent on this point. That there were inmates of seventy years and older is confirmed by the records.

As to the type of offender

The Egyptian prison system was not based on the idea that different types of offenders needed different “treatment”, but rather on the principle of retribution requiring that serious or repeated offenders be punished more severely. The prison system was organised according to harshness, which was conceptualised as a function of living and work conditions, distance from home and length of the period of imprisonment. Those convicted for serious crimes were usually either transported to Sudan or sent to the Alexandria Arsenal. The dividing lines between both shifted continuously (see Appendix 1). Short terms were served either in the police gaols (simple detention) or in the provincial prisons (simple detention, lowly jobs), or in industrial establishments (hard labour). The boundaries between these forms of confinement were not always clear.

115 As fixed in the Ordonnance concerning the prohibition for children and toddlers to roam in the streets (Lāyīya fi man‘ mur‘ir al-awdād wa-l-astil fi al-du‘uq) 28 Dhu‘al-Hijja 1261 (28-12-1845); text in Majlis al-‘Abkām, Daftar Majmū‘ um‘ūr idārā wa-li‘jā‘āt, Sin 7/33/1, p. 177.
116 Diwān al-Tarsānī, 954 (old), p. 131 and 956 (old) p. 7: eleven year old Sayyid Ahmad Buhayrī was sent to the Alexandria Arsenal on 15 Shawwāl 1281 [13-3-1865] for petty theft. He is entrusted to the regimental tailor and is allowed to spend three days later, on 18 Shawwāl 1281, 10 years old Nūr al-Dīn Ibrāhīm Muhammad enters the Alexandria Arsenal. Because his father is willing to vouch for him, he is allowed to spend the night outside the prison, but had to work in the forge during the day.
117 Ma‘īyya Saniyya to the Qā‘l ‘Alī Sa‘īdiyya, 16 Rābi‘ II 1272 [26-12-1855], Sin 1/8/40, Ma‘īyya Saniyya, Sādir al-Ma‘īyya illā al-Dawwānī wa-l-Qā‘īlam wa-l-Muḥāʃâzāt; p. 132; doc. 17, ordering the release of a minor boy in response to a petition submitted by his mother.
118 Majlis al-‘Abkām to Al-Mu‘awwana, 6 Ṛamadān 1280, ordering the transfer of a sick and nearly blind prisoner of over seventy years from forced labour in factories (Al-wāburāt wa-l-‘amālīyyāt) to forced labour in the region of residence (Al-ṣamā‘ah al-dan‘a ikh-l-Mudīrīyya), Sin 7/3/46, Majlis al-‘Abkām, Sādir al-Dawwānī, p. 5; Mudīr ‘umūm Asyūṭ wa-li‘jā‘āt to the kāṭīb al-Dīwān al-Khādiwī, 18 Safar 1272 [22-10-1855], requesting the release of an eighty year old man who had been sentenced to one year of forced labour for the Majlis Qiblī, without having seen him, Ma‘īyya Turki, Ma‘haṣa 8, leaf 20, doc. 376; Majlis al-‘Abkām to Majlis Iṣrā‘īl Qiblī, 1 Jumādā I 1281[11-11-1864], informing this Majlis of a Khedival order to transfer the former tax collector ’Abd Allāh Sāliḥ from the Fīqa Iṣlāḥīyya (see below) to the Alexandria Arsenal, on the ground that he is about eighty years old and cannot be corrected by the Fīqa Iṣlāḥīyya, Majlis al-‘Abkām, Sādir al-aqāšīl al-qiblī, Sin 7/4/33, p. 86, doc. 25; see also correspondence regarding the release from Al-Wāburāt wa-l-‘amālīyyāt of four prisoners three of whom are over 70 and one nearly blind, Al-Ma‘īyya al-Saniyya, Al-‘Awāmir al-‘Alīyya, Sin 1/1/27, p. 17, doc. 4, 17 Jumādā I 1281 and p. 25 doc. 7, 24 Jumādā I 1281; Al-Fāhrīqāt wa-l-‘amālīyyāt wa-l-wāburāt, Ma‘haṣat 311, doc. 112, 10 Jumādā I 1274 [25-1-1855].
From the early 1850s the separation of the different types of inmates became a special concern for the authorities. They proposed that separate wards or prisons be used for those held for debts, those kept in custody pending investigation and those convicted for light and for serious offences. The sources do not give information on whether this differentiation was ever implemented. In 1863 a general instruction was issued to the effect that gaols (i.e. police gaols and the gaols in the provincial centres) were to keep apart the following three categories of inmates: serious criminals like murderers and thieves, light offenders together with drunks, and debtors.

The first, and to the best of my knowledge only, time that the authorities showed interest in the rehabilitation of prisoners was in 1863, when a special program was initiated for convicts with sentences of three years or less, and for vagrants. The program was prompted by a concern about soaring crime rates, especially theft of cattle and cotton. Since the authorities believed that imprisonment had lost its deterrence, they ordered that the offenders be trained in crafts so that they could support themselves after their release. For the duration of their prison term they were enlisted in a special military unit, called al-firqa al-islāhiyya, reformatory unit, (also known as firqat al-mudhnbin unit of delinquents, and orta al-mudhnbin, battalion of delinquents). After the completion of their terms they would be trained in special trades and crafts companies (bulukāt al-ṣanā‘ī’). I have not found any information about the set up of this unit. For reasons that are not clear, this unit was operative for only a short time. Early 1865 it was disbanded and the prisoners who had not completed their sentences were sent to the Alexandria Arsenal. Those serving in the trades and crafts companies, having completed their prison sentences, were released.

**Release**

During the early years of Meḥmed ‘Ali’s reign, offenders were as a rule sentenced to imprisonment of unspecified duration and would not be released until they had repented and mended their ways. This was customary in the Ottoman Empire and Tunis before the nineteenth century. In practice this meant that after some time they or their relatives would send petitions requesting their release and that the Meḥmed ‘Ali would decide whether

---

119 See e.g. Dhikr waṣā‘il mutafarri‘a bi-l-majlis (List of further duties of the regional councils), enacted in the early 1850s, art. 5, Jallād (1890-1892) II, p. 105-6, laying down that those held in custody and those held for debt had to be separated from the convicts, and that these had to be separated according to the seriousness of their crimes.

120 Al-Ma‘īyya al-Saniyya, Qāyq al-awāmir al-karīma al-sā‘īda min qālam al-majlis bi-l-mu‘āwana, Sin 1/19/2, p. 1, doc. 1, order to the Majlis al-‘Abkām, 28 Rabi‘ I 1260 [12-9-1863]. For a similar order instructing that serious offenders should henceforth be detained in the Citadel rather than in the Cairo police prison, see Khedival order of 8 Dhi‘ al-Hijja 1281 [4-5-1865] (summary in card index s.v. sujun).

or not the term they had already served, had been sufficient. The system came to an end around 1830. The main purpose of the criminal legislation of 1829-1830 was to introduce a system in which law enforcers would pronounce specified sentences on the strength of legal provisions. This was successful. As from 1830, we can observe that criminal sentences began to define the term of imprisonment, as required in the criminal legislation of 1829-1830, and the previous practice of unspecified sentences began to be abandoned.

In the early years of Mehmed 'Ali's reign, the local administrators would send the convicts after sentencing directly to the prisons and labour camps. From the late 1820s, we find continuous missives to these local officials directing them to send lists of these prisoners to the Civil Council (Majlis Mulki), so that the situation of these prisoners could be monitored at the national level. Even after the central government, during the 1830s, finally established its control over criminal justice, numerous missives were sent, until well into the 1860s, to prison authorities to instruct them to send lists of the inmates and their cases, so that the central government could check whether convicts were released after the completion of their term. Complaints on this account submitted by prisoners were seriously investigated at the highest instance. From time to time, especially in the 1860s, the Majlis al-Ahkâm would be instructed to review the cases of those whose terms for some reason were not specified, or who had been given life sentences.

Completion of the prison term did not always imply freedom: young convicts were usually sent to the army after their release. On the other hand, however, convicts would often be released without having fully served their sentences due to the frequent general amnesties: between 1829 and 1869 I have found eleven instances. They were probably used to ease the overcrowding of prisons. When prisoners were released, they had to find a guarantor (dâmin), who would be personal responsible to produce him if the authorities requested his presence. If he failed to do so, he himself would be detained.

130 See Appendix 4 for a detailed list.
Conclusions

In the introduction I briefly summarised the theories of Foucault and Spierenburg explaining the development of the penal systems in Western Europe. Both of them relate the emergence of prisons as the main form of punishment to the rise of strong, centralised states. Foucault emphasises that France emerged as a centralised and strong state, with an efficient police force that could catch and bring to justice many more criminals that under the ancien régime. Therefore, deterrence by gruesome spectacles of suffering was not necessary anymore. It was replaced by deterrence based on the great risk for criminal offenders of being apprehended. Instead of publicly executed corporal punishment, imprisonment became the main form of judicial punishment. Prisons became disciplining institutions aimed at creating obedient subjects of the state. For Spierenburg the relationship with the rise of strong centralised states is more complicated. He situates the abolition of publicly executed corporal punishment in Elias’ civilising process. This process resulted in an aversion, among the elite, to the sight of corporal punishment and torture and the restraint of aggressive impulses. First this was restricted to the members of the elite groups, but as the nation state became better integrated the aversion extended towards all classes of society. Political action motivated by these sensibilities could be successful because the newly emerging centralised nation states were more stable and did not need anymore the spectacles of public executions and torture to enhance their authority.

As for Egypt, the link between the changes in the penal system and the process of political centralisation initiated by Mehemed ‘Ali is obvious. The history of criminal law during his reign shows, on the one hand, how he succeeded in bringing his officials under his control and, on the other, that enacted criminal law was one of his instruments of centralisation. Officials were made to realise that they could only administer it according to Mehemed ‘Ali’s instructions and under his supervision. When once he reprimanded an official for having tortured and mutilated a peasant who had committed an offence, before finally killing him,\footnote{See note 45.} what was at stake were not humanitarian considerations but rather an assertion of Mehemed ‘Ali’s authority, since the official had violated his instructions. Once he had disciplined his officials, his policy of centralisation could succeed. From then on punishment could only be imposed by virtue of enacted criminal laws. Prima facie this resembles the rule of law and the principle of nulla poena sine lege in Western European law. On closer inspection, however, both notions of legality were quite different. In Western Europe its first and foremost function was to restrict the power of the state and to protect the citizen against its encroachments. In Mehemed ‘Ali’s realm, on the other hand, it was a tool of state control and centralisation. Mehemed ‘Ali’s criminal laws aimed at tightening his grip on the corps of officials by forbidding them to commit certain acts and penalising them, and ordering them to behave in certain ways, i.e. imposing specific punishments when trying offences committed by their subjects. The criminal laws addressed the officials rather
than the subjects. It is illustrative that these penal laws were not officially publicised. If they were printed, then this was only for official use. The penal provisions must be read, not as guarantees for the citizens, but as instructions to officials on how to proceed when dealing with certain offences. The principal difference between the Egyptian and the Western European ideal of legality, is that according to the latter, the ruler had to obey the law, whereas the Pasha, regarding legislation as his personal commands, did not feel bound by it. His legal system can better be labelled as an instance of “rule by law”, as we find in many contemporary dictatorial states, than as a form of “rule of law”\textsuperscript{132}.

By the end of his reign Mehmèdh 'Ali had established tight control over both his officials and over the population. Instruments for the control of his subjects were a network of village, neighbourhood and guild sheikhs, monitoring the doings and dealings of those under their authority, and an efficient police force, using classical methods such as police spies as well as modern, scientific ones such as forensic medicine and chemical analysis.\textsuperscript{133} As a result of his greater grip on the country, public security increased and, as noted by contemporary European travellers, the number of executions decreased. Spectacles of brutal suffering such as death by impaling were not staged anymore after the 1830s. Banishment or deportation to the Sudan became a substitute for capital punishment. The public character of punishment, however, did not change. The execution of death sentences still took place in public and the bodies of the executed were left hanging on the gallows. And those sentenced to imprisonment and hard labour were not totally locked away behind prison walls but remained to some extent part of public life. They were transported in chains, like the columns of prisoners (chaînes) in eighteenth and early nineteenth century France and Spain, and those sentenced to hard labour often worked side by side with other workers, in industrial establishments as well as on construction sites. Moreover, public floggings were usual. This persistence of the public character of punishment is not exceptional. Spierenburg and others have criticised Foucault for presenting the change in penal policy as a sudden and abrupt one, and shown that it was a more gradual process. In France, for example, public executions (in some cases preceded by the amputation of the right hand) and other forms of public penalties such as the pillory and public branding were practised until the 1830s,\textsuperscript{134} although less frequently than before. In other Western European countries public executions and floggings continued until the second half of the nineteenth century.

The abolition of flogging and caning in Egypt in 1861 deserves separate discussion. It was part of a deliberate policy to reduce official violence, which had become feasible due to certain social and economic transformations of the country. An important factor, although one for which we do not have direct documentary evidence, was the presence, among the Egyptian ruling elite, of reformers, who began to consider corporal punishment as backward and uncivilised and argued that it had to be replaced in order to modernise the country. The importance of groups of Westernising reformers for the nineteenth century developments

\textsuperscript{133} On the development of the police, see Fahmy (1999b).

\textsuperscript{134} Léonard (1980), p. 12.
of penal systems has been documented for non-western countries like Russia, early colonial India (where the reformers, of course, were British and not Indian), and Peru. In Egypt, there were reformers in the nineteenth century, but they have left no documents regarding their ideas on legal punishment. Nevertheless, it is my contention that they influenced penal policy, especially with regard to the abolition of torture and corporal punishment. They must have followed the example of the Ottoman Empire, where corporal punishment had been abolished with the introduction of the Penal Code of 1858. It is doubtful, however, whether the Egyptian reformers were motivated by growing sensibilities against public punishment. The persistence of official violence outside the judicial sphere is evidence to the contrary. The ethnic gap between the Turkish speaking elite and the native Egyptian peasants must have been an effective barrier to empathy.

In order to explain why they could successfully implement their program, we first have to consider the function and meaning of official violence in nineteenth century Egypt. As I outlined in the section on corporal punishment, official violence was a mode of repression practised in three contexts: (1) as a means of coercion, to make people obey official orders (often in connection with tax collection, or drafting men for military service or corvée); (2) as a means to obtain confessions during criminal investigations, and, finally, (3) as a form of judicial punishment. During Mehmed ʿAli’s reign the Turkish elite ruled by means of violence. As the crops, money and the manpower demanded by the State from the population were often excessive and endangered its subsistence, they could only be collected by using brutal force. Moreover, corporal punishment was, especially in the countryside, economically more efficient than imposing prison sentences, because after a period of recovery, the peasant could go back to work. That the use of torture was regarded as normal and as a useful and helpful method in investigating crime, stemmed from the fact that the techniques of investigating crimes were still very primitive: investigation, usually conducted by administrative officials, focused on extracting a confession from one or more suspects. In addition, the use of violence, and especially the wielding of the kurbâj, symbolised authority, in the same manner as public executions did. For all these reasons, the flogging of peasants by Turkish officials was common and widespread.

Mehmed ʿAli’s measures to restrict to some extent the use of violence were inspired by two factors: first, it had to be made clear that wielding the kurbâj as a symbol of power was ultimately controlled by the central government. Since the execution of capital punishment was the Khedive’s prerogative, an official who killed a subject by an excess of beating or flogging, would intrude on the Khedive’s rights. This rule was indeed enforced and officials who killed subjects were brought to justice. A second point was that violence should not damage the productive capacity of his subjects by killing or incapacitating the subjects. Within these restrictions, flogging continued to be practised as a way of repression and enforcing obedience.

137 See Aguirre (1996).
The first substantial steps in restricting official violence were taken in connection with criminal investigation. These steps were made possible by the extension and growing efficiency of the state apparatus. By the 1850s a fully-grown, specialised police force had come into existence as well as an extensive public health administration which was also involved in police work. The increased professionalism of those involved in criminal investigations and the use of scientific methods, showed that there were better ways of finding the truth than trying to obtain a confession. This led to the realisation that torture was not a very effective instrument of finding the truth and made it possible for reformers as from the early 1850s to enforce measures to restrict and finally, in 1861, banning it.

It is not entirely clear what immediately prompted the abolition of flogging as a punishment in 1861, because the decree itself is silent on its considerations. At the political level, the reformers could point at the example of the Ottoman Empire where corporal punishment had been abolished in 1858. But that this reform could be effectively introduced was because the need of official violence in the countryside had decreased due to economic developments. Before 1842, Egypt was a command economy, dominated by Mehemet Ali’s monopoly. Peasants produced for the Pasha, who therefore had a direct interest in their productive capacity. Corporal punishment was therefore economically more advantageous than imprisonment. This changed after the State monopoly was abrogated and the State’s extraction of the rural surplus became limited to tax collection. Mehemet Ali’s successors had therefore a more abstract and remote interest in the productive capacity of peasants. They were not too much concerned about the imprisonment of peasants. Connected with this development is the fact that during Mehmed Ali’s reign demands on the rural population in produce, corvée labour and men for conscription often jeopardised their existence and could only be collected by force. With the reduction of the army in the 1840s and the easing of corvée in the 1850s, the need for violent coercion diminished. A final but crucial factor was that the dearth of rural labour in the countryside had come to an end. If peasants fled from their villages during Mehemet Ali’s time, they were forcibly returned, because their labour was needed. This changed during the 1850s with the rise of large estates and the dispossession of many small holders. Peasants became expendable and there was no need anymore to except them from imprisonment of they committed an offence. If sentenced to hard labour, they could be profitably employed in the agricultural projects in the Sudan, as was decreed in 1857 (see Appendix 1).

By the 1860s imprisonment had prevailed in the Egyptian penal system as the main punishment. By that time prison conditions had improved and mortality among the inmates had dropped drastically. This meant that imprisonment did not anymore entail the risks of gratuitous and unintended suffering and death due to pernicious prison conditions. Imprisonment, therefore, became a viable substitute of flogging, as it could now also be

quantified precisely. Now, was this development linked to a change in penal policy? Did the rulers begin to regard imprisonment as a means of reform and rehabilitation of the prisoner? And did they introduce changes in the prison system to this end? There is little evidence that this was the case. There have been no attempts to set up penitentiaries and introduce prison regimes that were intended to morally improve and rehabilitate the prisoners. The only exception is the short-lived experiment of the military trade and craft units, established in 1863 because of a concern about the rise in rural crime. However, these units were dissolved a year and a half later. It is not clear how they functioned, but the fact that the experiment was not continued shows, I believe, that there was no sufficient support for the idea. Rehabilitation of offenders seemed not to have been on the agenda of the ruling elite. The reforming zeal had stopped at the banning of corporal punishment. The main punitive functions of imprisonment were not the imposition of discipline but rather deterrence and retribution. In other words, imprisonment was an instrument of repression aimed at the subjection of the population, not at the disciplining or reforming of the offender.

Appendix 1  Distribution of Categories of Prisoners over the Penal Institutions

The articles of the various penal codes specify the type and duration of imprisonment to be imposed on the perpetrator of the offence defined in the article. However, from time to time decrees were issued modifying this and laying down that certain types of offenders or persons sentenced to a certain prison term, were to be transported to Sudan or serve their time in specific prisons. Hereunder I will give a survey of such decrees in order to make clear the hierarchy and relations between the different penitentiaries.

Banishment from Egyptian Territory
1846-1852: convicts with a life sentence were to be sent via the Sudan to Ethiopia.142

Sudan
1844: Officials guilty of embezzlement to be sent to the Sudan to work in agriculture (art. 196 QM)
1846: prisoners with sentences of two years and more to be deported to the gold mines.143
1848: serious criminals to be deported to Jabal Dâl.144
1852: convicts with life sentences to be deported to Jabal Qisân.145
1857: peasants and rural sheikhs sentenced to five years or more of forced labour for manslaughter to be deported to land reclamation areas in the Khartoum Province (could be accompanied, on a voluntary basis, by their families).146

142 See note 98.
143 Ibid.
1858: measure extended to persons convicted for theft for the fourth time.\(^{147}\)
1863: convicts with sentences longer that five years to be deported to Fayzoghli.\(^{148}\)
1865: convicts with sentences of over ten years to be sent to the White Nile.\(^{149}\)

**Alexandria Prison**

1860: convicts with sentences of one year or more to be sent to the Alexandria Arsenal.
1862: convicts with life sentences, murderers and repeated offenders had to serve their time in Alexandria.\(^{150}\)
1865: convicts with terms under ten years to be sent to the Alexandria Prison.\(^{151}\)
1866: only convicts with sentences up till three years served in the Alexandria Arsenal as appears from the registers of the Alexandria Arsenal.

### Appendix 2 The Nineteenth Century Egyptian Criminal Laws

**Penal Code of 1829 (PC 1829)**
Turkish text and translation in Peters (1999b).

**Law of Agriculture (Qāni̇n al-Filāha) of 1830 (QF)**
Text published as an appendix to Lāyi̇ha (1840-1841) and in 1845 included in the QM (art. 1-55).

**Penal Code of 1845 (Al-Qānūn al-Muntakhab) (QM)**
Text in Zaghlūl (1900), app. 100-155 and Jallād (1890-1892), III, 351-78.

**Penal Code of 1849 (PC 1849)**
Printed in a bilingual (Arabic and Turkish) edition by Dār al-Ṭībā‘a al-‘Āmira al-Miriyya in Bulaq on 8 Rajab 1265.

**The Imperial Penal Code (Qāni̇nnaμme al-Sulṭānī) (QS)**
Text in Zaghlūl (1900), app. 156-178; Jallād (1890-1892), II, 90-102. Jallād also gives the administrative regulations (Harakāt) issued together with the Code (p. 102-11).

The Supplement of 5 articles to the QS drafted by the Majlis al-Ahkām in 1275 [1858]. Text in Śāmī (1928-1936), III/1, p. 294-7.

\(^{147}\) Art. 1, decree of the Majlis al-Ahkām, 25 Muḥarram 1275 (4 September 1858); text in Śāmī (1928-1936), III/1, p. 294-297; ratification by the Khedive ultimo Śafar 1258, ibid., p. 301.

\(^{149}\) Khedival order to the Majlis al-Ahkām, 4 Jumādā II 1282 [25-10-1865], Śāmī (1928-1936), III/2, p. 625.

\(^{150}\) Missive from the Ma‘īyya Sanīyya 29 DH 1276 [18-7-1860], Majlis al-Ahkām, Daftar Majmū‘ Umūr Jinā‘yya, p. 133. Missive from Ḫāfiz Pasha, commander of the Navy, 12 Rabī‘ I 1278 [7-9-1862], ibid.

\(^{151}\) Khedival order, 4 Jumādā II 1282 [25-10-1865], Majlis al-Ahkām, mahāfaẓa 9, doc. 323/3.

\(^{152}\) Dīwān al-tarsāna, 955 (old).
Appendix 3  

A Description of the Five Sijills
Regarding the Alexandria Prison

DWQ, Diwān al-tarsāna, 953-957 (old), Qayd asmā’ al-madhūbin bi-limān tarsānat
Iskandariyya [This is the title as given on the first leaf of the sijill]. On the cover, as in
the index, this series is erroneously referred to as: Qayd asmā’ al-madyūniyya bayān tarsānat
Iskandariyya.

Sijills:
953: 29 Šafar 1263 till 4 Dhū al-Ḥijja 1268
954: 13 Rajab 1277 till 5 Dhū al-Qa‘da 1281
955: 5 Dhū al-Qa‘da 1281 till 24 Rabī‘ I 1283
956: 24 Muḥarram 1278 till 26 Rabī‘ I 1285
957: 26 Rabī‘ I 12 85 till 10 Šafar 1286

There is a gap between no. 1 (29 Šafar 1263 to 4 Dhū al-Ḥijja 1268) and no. 2 that
begins in 13 Rajab 1277. The nos. 2 to 5 are consecutive. No. 4 seems to be an exception
as no. 3 ends on 24 Rabī‘ I 1283 and the first entries are dated 24 Muḥarram 1278. The
reason is that the first 20 pages of no. 4 are a recapitulation of the previous sijills, listing
by their date of entry all prisoners present on 1 Jumādā I 1283, that is all prisoners convicted
for homicide who had not benefited from the amnesty of 5 Rabī‘ I 1283.

The sijills give the following information:
- name
- beginning of detention spent before arrival
- description and estimated age (is lacking in sijill 953)
- short description of offence
- length of sentence
- date of arrival
- number and date of covering letter
- date of the end of the sentence
- date of release or decease with date and number of pertinent correspondence

These sijills offer suitable material for statistical analysis that could deepen our knowledge
about nineteenth century Egyptian criminality and the judicial system.
Appendix 4  General Amnesties\textsuperscript{153}

23-6-1828 / 10 Muḥarram 1244
Amnesty for all Abū Qīr prisoners. DWQ, Diwān Khidīwi Turkī, 739 (old), p. 6, doc. 19.

5-6-1832 / 6 Muḥarram 1248

17-4-1849 / 24 Jumādā I 1265
General amnesty for all prisoners except murderers and robbers. DWQ, Majlis al-Ḥākāmī

23-6-1856 / 19 Shawwāl 1272
Amnesty for all prisoners except murderers, thieves and robbers. Muḥāfīẓ al-Qāl‘a al-Sā‘īdiyya to Khāzīn Khidīwi, DWQ, Ma‘īyya Turkī, Maḥfāza 12, no. 24, doc. 254.

18-3-1861/ 6 Ramadān 1277
Amnesty for murderers, thieves and robbers in the Alexandria dockyards and employed in lowly jobs in the regional prisons, at the occasion of the circumcision the Khedive’s son. Order to Mudirīyyat al-Khārtūm, DWQ, Sīn 1/1/15, Ma‘īyya Saniyya, Ṣādir al-Awāmir.

10-7-1862/ 12 Muḥarram 1279
Amnesty to all prisoners at the occasion of the circumcision of a son of the Khedive. DWQ, Ma‘īyya Saniyya, Daftar 1902 (old), Awāmir, p. 79, doc. 26.

2-2-1863 / 12 Sha‘bān 1279
General amnesty, except for murderers and thieves. DWQ, Ma‘īyya Turkī, Daftar 530 (old), p. 67, doc. 23.

11-2-1865 / 15 Ramadān 1281
Amnesty for those who, after completion of their term in the “reformatory unit” (fīrqā ʻislāhīyya), were drafted into the “work companies” (bulūkāt al-ṣanā‘iy), DWQ, Ma‘īyya Turkī, Daftar 539 (old), p. 54, doc. 53.

10-12-1865 / 21 Rajāb 1282
Amnesty for all prisoners whose remaining time was less than ten months. DWQ, Ma‘īyya Saniyya, Awāmir, Daftar 1921 (old), p. 99, doc. 23.

18-7-1866 / 5 Rabī‘ I 1283
Amnesty for prisoners with sentences of less than three and a half years, except murderers, robbers, and debtors. DWQ, Ma‘īyya Saniyya, Awāmir, Daftar 1915 (old), p. 112, doc. 8.

22-7-1868 / 1 Rabī‘ I 1285
Amnesty for prisoners with a remaining time of three months or less. DWQ, Ma‘īyya Saniyya, Awāmir, Daftar 1927 (old), p. 82, doc. 5.

3-12-1869 / 28 Sha‘bān 1286

\textsuperscript{153} If the source mentions the old classification of the DWQ registers, the reference has been taken from the DWQ card index, s.v. sujūn and not directly from the document.
