A Lunette Stela of Pasenedjemibnash in Cairo Museum CG 22151

ALI ABDELHALIM ALI*

HIS research is an analytical study of a round-topped limestone stela, currently stored in the Egyptian Museum in Cairo (CG 22151). The stela was made for Pasenedjemibnash and dates to the first half of the 2nd c. BC. It was discovered by Urbain Bouriant in the cemetery "Al-Hawawish" at Akhmim in Upper Egypt during the excavations by the French Mission under the supervision of Gaston Maspero in 1884-1885.4

BIFAO 114 - 2014

Description [FIG. 1-2]

The stela is in a good state of preservation. It has fine relief scenes and hieroglyphic inscriptions, both of which are executed in sunken relief. It is divided into three parts: lunette, horizontal register and vertical rectangle. Both the register and the rectangle are framed by one vertical incised line on each side as well as horizontal lines between each line of hieroglyphic text. Its height is 0,60 m and its width is 0,38 m.

Upper Section (Lunette)

As noted above, the stela is round-topped. The upper section is decorated with the winged sun-disk with a cobra hanging from each side. The cobra on the left wears the crown of Upper Egypt (Nekhbet), while the other wears the crown of Lower Egypt (Uto). Between the two cobras, the following phrase is inscribed: Bhdt ntr '3 nb, "Behdite, the great God, Lord of (sky)". It is notable that the sky-sign, which is usually a part of the last phrase, is elongated to cover the register. Nineteen stars decorate this sky-sign.

Register

On the register is a scene of the stela's owner facing six deities. All of the figures are standing⁶ and each is captioned with a short text indicating their name and titles. Pasendjemibnash is standing with his Ba-soul perched on his head. Both are posed in the attitude of adoration. In front of him a tall, slender offering table with long leg. On it sit flowers, loaves of bread, and a water vessel.⁷ The owner is dressed in a long garment. His titles, followed by his name, are written in two vertical columns in front of the *ba*-soul:

Sm3ty imy-is P38-sndm-ib-n'59

Stolist, 10 councillor, 11 Pasendjemibnash

- 5 Instead, U. Bouriant copied \mathbb{T}_{0} , "the perfect god".
- 6 M. LICHTHEIM, "The Stela of Taniy CGC 20564: Its Date and its Character", *SAK* 16, 1989, p. 205.
- 7 The same table with its contents is depicted on other stelae in Cairo Museum, e.g. CGC 22015; CGC 22017; CGC 22128; CGC 22136; CGC 22152. A *nw*-jar instead of the vessel in CGC 22053 and CGC 22035, while *nw*-jar with the flowers and without the loaves on CGC 22122.
- 8 The *p*-sign is between the *is* and *imi*-signs. The latter two signs are transposed.
- 9 Note the forearm with the hand holding a stick (Gardiner, *Sign List* D 40) instead of the usual forearm for the phonogram '.

10 For the transliteration sm3ty, see Gardiner, Sign List Aa 25. Greek Στολιστής means "one who clothes the god" especially Min and Horus. Besides clothing, the stolist was responsible for cleaning and anointing of god's statue. In addition, he appears in the *sd*-festivals and the divine service at Memphis particularly for Min: W. HELCK, Untersuchungen zu den Beamtentiteln des Ägyptischen *Alten Reiches*, *ÄgForsch* 18, 1954, p. 45-49; H. GAUTHIER, Le Personnel du dieu Min, RAPH 3, 1931, p. 39-43, 49-50; P. Leahy, "Two Late Period Stelae in the Fitzwilliam Museum", SAK 8, 1980, p. 174, no. 20.

The deities facing Pasenedjemibnash, arranged from right to left, are Min-Re, Aperet-Isis, Osiris, Isis, Horus and Nephthys.

• *Min-Re* is shown in his typical mummiform style, standing on the *Maat*-base, with an erected phallus. His torso is covered with criss-crossing bandages. He raises his right arm, holding the *nlyb*-symbol. He wears the divine beard and the tall double-plumed crown with the sun-disk between the plumes. This crown is so tall that it extends slightly into the vault of sky above the figures. Behind him stands a pole and a sanctuary topped with three heads of lettuce.¹² Min-Re is accompanied by the following phrase:

Dd-mdw in Mn-R' nb İpw ntr '3 nb pt Words to be said by Min-Re, lord of Akhmim, great god, lord of the sky

• Aperet-Isis¹³ is depicted as a standing lady wearing a narrow garment clinging her body. She wears Hathor's headdress, the cow's horns supporting the sun disk. She holds the 'n\(\ell\)-sign in her right hand, while her left arm is bent upwards with the palm facing forwards. Her name is written in front of her headdress:

M971

pr(t)-İst

Apere(t)-Isis

• Osiris is shown as a mummiform figure standing on the *Maat*-base. Grasping the 'nh-w2s-dd composite sceptre in his hands, he wears the tripartite crown and the divine beard. His name and title are written in front of his crown:

Wsir hnty-imntt Osiris, foremost of the westerners

- *Isis*, crowned with a throne, stands behind Osiris. In her right hand, she holds the 'nḥ-sign. In her left hand, she holds up the \tau w-sign. She is dressed with a slender garment like Aperet-Isis. She is described as follows:
- 12 This is a symbol frequently shown behind Min. The sanctuary refers to the tent of the desert protected by him. St. Quirke, *Ancient Egyptian Religion*, London, 1992, p. 46; H. Gauthier, *Les fêtes du dieu Min, RAPH* 2, 1931, p. 169-172.
- 13 Aperet-Isis appears on other stelae from Akhmim, e.g. CGC 22007, I; CGC 22053 (A. AWADALLA, "Une stèle cintrée de *Ns-Mnw*, Caire CGC 22053", *SAK* 25, 1998, p. 3-4); CGC 22095, I; 22139, 4; Stela BM 1139. The name is reversed (Isis-Aperet) in 22114, 2; CGC 22070, 2. She protects the king's figure and carries the offerings of the

Íst wrt mwt-n<u>t</u>r

Isis, the great one, mother of the god (i.e. Horus).¹⁴

• *Horus* stands behind his mother (i.e. Isis). He is depicted as a falcon headed deity wearing the double crown and Uraeus. He wears a short kilt with an oxtail hanging down in the back. Horus holds the 'np-sign in his hands and he is accompagned by the inscription:

Ḥr s3-İst ndty-it=f

Horus, son of Isis, the protector of his father

• *Nephthys*, vested by a narrow garment, is depicted with the 'nḥ-sign in her right hand, while she holds up the same sign in her left hand. The inscription beside Nephthys is:

IFMOI

Nbt-Ḥt snt-nt̞r

Nephthys, sister of the god

Main Text [FIG. 2]

The lower part of the stela contains a text in 20 horizontal lines running from right to left.

the register of the stela, see M. MÜNSTER, Untersuchungen zur Göttin Isis vom Alten Reich bis zum Ende des Neuen Reiches,

General Commentary

The stela bears an unique depiction of the *ba*-soul perched on the owner's head. As far as I know, this scene has no parallel. There are some Theban stelae, which depict the deceased together with his ba-soul, adoring the sun-barge. The ba-soul on those stelae is standing in front of the deceased.¹⁵ On the stela of Hor-Min in the Berlin Museum, the deceased holds his ba-soul on his left arm. 16

Another distinctive characteristic of this stela concerns with the sky between the lunette and the register. This sky serves a double function: it represents the sky over the scene, in addition it stands for the word pt, which comes in the bhdt- ntr-3-nb-pt formula.

Although its meaning is somewhat obscure, the main text on the lower part of the stela could be divided several items:

- I. The introduction (line I), including information about the owner: his name, titles, and parents (genealogy). It is repeated in line 11. It is remarkable, that the scribe does not use the same expressions, such as *mi-nn* and the title of Tagelibus (*ihyt n Mnw*). He uses the egg, instead of reusing the goose for "son".
- 2. An appeal to the gods, priests (six categories: w'b, rhw-iht, hm-ntr, it-ntr, wnw, hryw-hbt) and inhabitants of Akhmim (lines 2-4), to guard the stela and protect it.
 - 3. An appeal for offerings using the offering formula (lines 4-12).
- 4. A self-portrayal (lines 13-16), in which social and ethical aspects, as well as the owner's piety, are put forth.
 - 5. Wishes for the afterlife (lines 4-14, 17-18).
 - 6. Wishes for his successors (lines 17).
 - 7. A threat (lines 18-19). 17
 - 8. A promise for security (lines 20).

The deities are mentioned either directly or alluded to. The gods and goddesses on the register are mentioned again in the text (lines 4-6). They are described as gods and goddesses or as the pantheon of Akhmim and its necropolis. Each deity has his or her proper epithet connected to Akhmim: Min-Re is "Lord of Akhmim". Moreover, the god Min-Re is described

as a "noble god" and "king of the gods" (lines 16-17). The god has a special temple in the text, the "house of the moon" as well. This house could refer to the connection between Min-Re to Thoth, the lunar-god. The "temple of his mother" refers to the temple of Min-Re at Akhmim.

Other gods in the register (Aperet-Isis, Sokar-Osiris and Isis) have the title "*hry*", "in the middle of" and refers to visiting deities. On the other side, Nephthys has no title with respect to Akhmim in the main text, while Horus has the particular title "great in Akhmim". Horus and Min-Re are strongly connected. Both are children of Isis and Osiris.¹⁸

In addition to the main gods of Akhmim, some funeral aspects of the cosmic gods are to be considered: Re is lord of the sky, Geb is lord of the earth, Osiris is lord of the netherworld (lines 8-9). The winds are connected to Tatenen and Atum (line 10), while the place of punishment is related to Hathor as goddess of the necropolis.

Also, there are some allusions to some deities, whose titles are mentioned in the main text, such as Thoth (*rþ-sw*, line 12). Thoth had an importance in Akhmim, especially in his connection to the family of Pasenedjemibnash, whose mother's name is Tagerheb. Heb is a part of the latter's name and developed into the Greek word (ibis), the sacred bird of Thoth. In the necropolis of Al-Hawawish, many Ibis mummies were found.¹⁹ In addition to his connection to the mother of Pasenedjemibnash, the house of the moon is accented.

Furthermore, the main text contains some philological, paleographical and epigraphical characteristics. To express the meaning of "all or whole", the following structures are used: nb (lines 2, 3, 6, 7, 8, 9, 16, 18, 20), mi-qd+suff. (line 2), r-3w+suff. (line 2), mi-3v+suff. (line 3), nbw tp t3 (line 3). This variety of suffixes enriches the context and avoids redundancy. In addition, the text contains a kind of pun by using the similar sounding words. This pun is a technique known from rhetoric. Such cases are: wnw wn-sn (line 3), phr s3-tn hr s3-tn (line 4), irr(w) [...] irw [...] irw [...] irw (lines 13-14). Some words and signs are written in several forms:

- - 2. The word s (man) is written normally in line 18, but in an unusual way $\frac{1}{2}$ $\frac{1}{2}$ in line 20.
 - 3. The determinative of hb occurs in two forms: \Im in line 1, and \Im in line 11.
 - 4. The definition particle p_i is written in two different ways: \square in line 1, and \bowtie in line 11.

Some hieratic signs are used in the main text, surely because the scribe copied the text from a papyrus scroll.

- I. The sign n is written as $---^{21}$ in almost every line except for line 15, where --- for mw (water) and ibw (thirsty) is found.
- 2. The small circle \circ is used for the signs \ominus (line 6); \otimes (lines 3, 5, 6, 15, 16); \ominus (lines 4, 7, 10, 16); \Box (line 9); and \ominus (lines 2, 7, 8, 12, 13, 14, 16, 18, 19).
 - 3. The $\ \ \ \ \ \ \ \$ sign (line 3) is similar to the *mn*-sign (line 20).
- 4. The negative (n) is \sim in lines 9, 10, 16, and 19, but \cap in lines 11, 12, 17 and 18, \wedge in line 12, \cap in line 12. It is similar to the word \cap \cap .
 - 5. The word for clothes (*mnht*) is written $^{"}$ ²³ (line 15).
 - 6. $\frac{1}{4}$ stands for the trilateral-sign 'h' (lines 4 and 16). It seems to be a shm-sign.²⁴
 - 7. $\sqrt[4]{}$ for the vocative (lines 2 and 16).
 - 8. / 25 is used as a determinative for *lpnms* (line 15).

Confusion between signs is also attested in the main text, such as:

- 1. The sign for flines 2 and 9.
- 2. The $\mbox{\ $> \ nds-bird}$ as a determinative for words for "bad" (lines 12, 16, 17, 18, 19) is replaced by the $\mbox{\ $> \ wr-bird}$. The latter is correctly used only in lines 5 and 11.
 - 3. The word "million" (line 4) is placed between the st- and the t-sign.
 - 4. The scribe added the suffix = f after mwt (line 6), apparently as a correction.
 - 5. For the word htp, the scribe put a and a upon the a (line 3).

As shown in the previous pages, our stela presents a unique example of both depiction and text from Ahkmim. Therefore, this study could be a beginning for a wider project on the stelae of Akhmim from Greco-Roman period. This project will provide Egyptology with rich information on titles, society and funeral aspects at that time.
