Some 18th Dynasty Hieratic Ostraca from Deir el-Bahri

KHALED HASSAN*

THE present paper deals with a group of hieratic ostraca stored in the basement of the Egyptian Museum of Cairo. These ostraca are written in black and red ink. Unfortunately, the available data concerning the exact find spot of these ostraca in the museum's registers are very few. According to a brief note found inside the box, these ostraca were perhaps uncovered during the excavations of the Metropolitan Museum by H. Winlock at Deir el-Bahri between 1911 and 1931, either from the north-east side of the court of the Hatshepsut temple or from one of the Naville's dumps.¹ Their topics vary between lists of names, distribution of beer in *wšm*-vessels, and list of supplies presented by the temple of Tuthmosis II to Hatshepsut temple, in addition to a necropolis journal for workmen. Presumably these workmen were involved in establishing royal buildings in the area of Deir el-Bahri and the Valley of the Kings. According to the topics as well as the palaeography of the texts, these ostraca are probably to be dated from the first half of the 18th Dynasty.

* I would like to express my gratitude to Prof. Dr. Soad Abd el-Aal (Cairo University), and to Prof. Dr. Ursula Verhoeven (Mainz University), for reading the manuscript and giving me

valuable comments. These ostraca are considered as a part of my PhD thesis that was conducted under their supervision and finished in 2014.

1 For more information about these dumps cf. WINLOCK 1942, p. 68; HASSAN 2013, p. 183.

O. Cairo DeB. No. 518²

[pl. 1, fig. 1-2]

Description

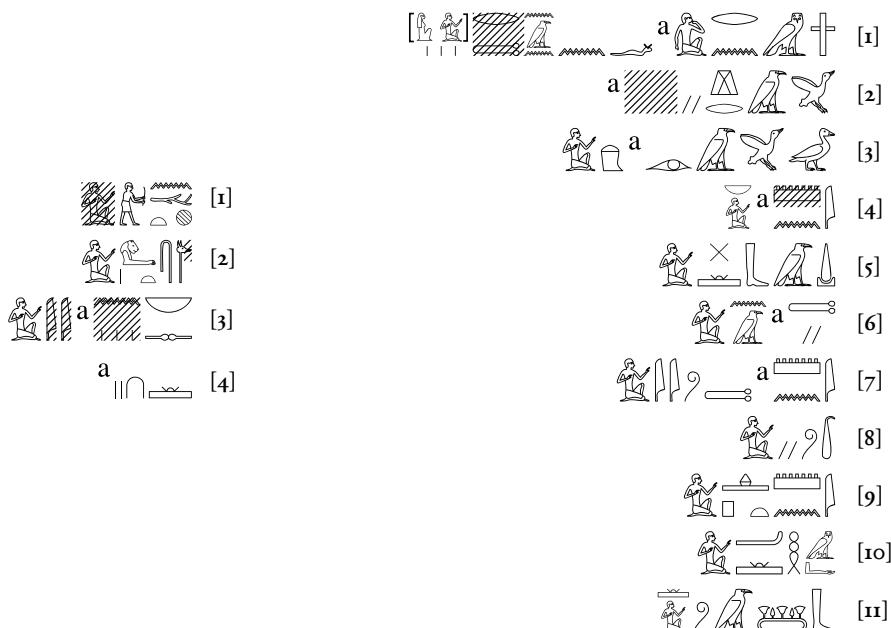

Provenance: Deir el-Bahri
Dimensions: H. 13 cm; W. 7.5 cm
Material: Limestone
Date: New Kingdom, 18th Dynasty
Current location: Egyptian Museum of Cairo

This ostracon is written in black ink on one side only. The text is complete in two columns. The first one consists of eleven lines, starting with the heading. The second column consists of four lines only. The ink is faint in some places; nevertheless the handwriting is neat and readable in most of the text.

Hieroglyphic Transcription

Col. 2

Col. 1

² This number represents the serial number that has been assigned by a team of the Cairo University, the author was one of this team, who was authorized to

make a classification of the whole ostraca that are housed in the basements of the Egyptian Museum of Cairo, and does not relate to the entry or the temporary

numbers of the museum's registers. It is worth mentioning that these ostraca are not recorded in the registers of the Cairo Museum.

Palaeographical Remarks

Col. 1

L. 2, a. : It is very faint, but it could be part of the name.

L. 3, a. : Perhaps stands for the sign ,³ rather than the sign .

L. 4, a. : It represents the group in the name of *Imn*. Compare the same group in the name of *Imn-htp* in l. 9.

L. 6, a. : Uncertain form of .

L. 7, a. : It could stands for the group .

Col. 2

L. 3, a. : It represents the group in the name of *Nb-sny*.⁴

L. 4, a. : The number is not clear, but according to the sum of the names most probably to be read as 12.

Commentary

As stated in the headline, the text is a list of workmen. As the ostraca came from Deir el-Bahri, these workmen could be involved in the construction of the temple.

Col. 1

L. 4. Nb-*Imn*

This name has two forms *Imn-nb* or *Nb-Imn*.⁵ It is clear that there was more than one individual who had the same name, such as the scribe Nebamon who occurred on an ostraca found in the tomb of Senmut (no. 71) at Deir el-Bahri.⁶ This name also appears on an ostraca, alongside the serfs “*mrw*”, dated to year 10 of Tuthmosis III and found in the second court of Hatshepsut’s Temple.⁷ Nebamon also occurred on two ostraca without titles; one came from Gurna,⁸ and the other from Deir el-Medina.⁹ It is difficult to determine which one of the previous names could be identified with our Nebamon.

L. 5. *D3b*

This name has many variations like             <img alt="Hieroglyph for a person with a staff" data-bbox="103665

L. 2. , *Wsr-h3t*

Maybe, this name could be identified with the mason *Wsr-h3t* who occurred with the mason *Mb* on an ostracon found in the tomb of Senmut.²⁵

L. 3. , *Nb-sny*

This name has been written in many forms , ,  in addition to . At least five individuals bearing this name are attested during the first half of the 18th Dynasty.²⁷ This name is mentioned alongside other 18th Dynasty workmen on an ostracon found at Deir el-Medina, but without any titles.²⁸ The herdsman Nebseny appeared with another herdsmen on an ostracon dated to year 46 of Tuthmosis III.²⁹ Another Nebseny occurred on an ostracon found at Abydos dated back to the 18th Dynasty.³⁰ Furthermore, two names are mentioned on papyrus Louvre E. 3226,³¹ one of them holds the title *ss*.³² In later times, this name is attested on papyri dating back to Amenhotep II with his son *H3t*.³³ It is worth noting that any identification of Nebseny of the present ostracon with any of the previous mentioned individuals is uncertain.

O. Cairo DeB. No. 407

[PL. 2, FIG. 3-6]

Description

<i>Provenance:</i>	Deir el-Bahri
<i>Dimensions:</i>	H. 11 cm; W. 7.5 cm
<i>Material:</i>	Limestone
<i>Date:</i>	New Kingdom, 18th Dynasty
<i>Current location:</i>	Egyptian Museum of Cairo

The ostracon is inscribed in black ink on both sides. The recto consists of ten lines. The ink is very faint in many parts of it. The first line, which is considered the heading line, is incomplete and some signs are missing. The dirt on the lower part of the recto and the poor condition of the surface makes it difficult to read some words. The verso consists of three lines, the first two lines are broken and many signs are missing as well.

Hieroglyphic Transcription

Palaeographical Remarks

According to the palaeography, the handwriting bears the same features as the 18th Dynasty ostraca of Deir el-Bahri, as well as that of the P. Louvre E. 3226:

Recto

L. 1, a. The beginning of the dating formula is lost, so that the year number is uncertain.
 b. : it could represent  as a part of the year number. Usually, the complete formula of the date was composed of year, month, and day. However, I am not inclined to read this sign as *ʒbd* 4 “month four,” because the form of this group in the date is different from the present shape. The usual writing is  .³⁴

L. 2, a. : Despite the faintness of the lower part of the sign, it is likely to represent the animal of Seth . It seems that the scribe overstated in his writing for the animal’s tail, as the usual form of the animal is .³⁵

L. 3, a.  : Based on the remaining traces, one could restore the word to read  . This form is similar to the handwriting of P. Louvre E. 3226 .³⁶

Commentary

This text contains a list of attendance of workmen, accompanied here with the names of their fathers. This kind of parentage list was not in common use among name lists.⁴⁴

Recto

L. 2. , *Stb*

As far as I know, this individual did not occur on any ostraca of the 18th Dynasty; especially those dated to the first half of the 18th Dynasty at Deir el-Bahri, i.e. Hatshepsut and Tuthmosis III.

L. 3. , *Sn=i-rs*

It is uncertain whether he is the same scribe Senires, who appears in the P. Louvre E. 3226, which is dated to the 18th Dynasty.⁴⁵

L. 4. , *Sn=i-nfr*⁴⁶

This name could be identified with the workman Sennofer who occurred on many ostraca found in the tomb of Senmut at Deir el-Bahri.⁴⁷ This individual was mentioned as a workman who was responsible for smoothing the walls of the tomb , *hrj*.⁴⁸ He is also attested on another ostracon from the same tomb holding the title *tw.w*, “shorer”.⁴⁹

⁴⁴ A similar list dated to the 18th Dynasty has been published by ČERNÝ, GARDINER 1957, pl. XVI, 5. Most of the names are accompanied with the names of their fathers. However, one or two names are inscribed in the names of their mothers, while a few names are still without second name.

⁴⁵ MEGALLY 1971, p. 163. Another Senires lived at the time of Amenhotep I and Tuthmosis I, holding the title *hsy-m niwt ryt, imy-r snyt*: HELCK 1958-1975, p. 523-3.

⁴⁶ It is worth noting that this name is different from Sennofer, who occurred in P. Louvre E. 3226. Sennofer of P. Louvre E. 3226 is mentioned holding the title *imy-r sdywt*, “Chief of the grain treasury”. MEGALLY 1977, p. 280. This man kept his position until year 32 of Tuthmosis III, and many years under Queen Hatshepsut. MEGALLY 1977, pp. 280-281. For more information cf. HELCK 1958-1975, pp. 348-351.

⁴⁷ HAYES 1960, pl. XIII, nos. 63 rt. 5, 64 rt. 5, XIV, 65-2 66 rt. 6, 69-3.

⁴⁸ According to Hayes, the word *j*“ describes the action of smoothing the wall surfaces of newly excavated parts of the tomb, by rubbing it with lumps of sandstone or other abrasives. This phase of smoothing following their “trimming” *s*“d and prior to their being “faced” or “overlaid” *dgr* with plaster. HAYES 1960, p. 31.

⁴⁹ HAYES 1960, pl. XIV, no. 69-3. , *tw.w*: shorer, derived from the verb , stay, shore-up, support, HAYES 1960, p. 40.

L. 5. , 'b3'⁵⁰

This name could be identified with the workman 'b3, who is attested on two necropolis journals ostraca along with well known 18th Dynasty workmen.⁵¹ It is worth noting that 'b3 was recorded as the first name in the lists with the highest amount of rations among the other workmen. It could be a probable indication that he served as a senior of this group or perhaps, at that time, he was not a young man or at least he was the oldest of them.

L. 7. , P3-sr

This name could be identified with the individual Paser who occurred on an ostracon dated to the 18th Dynasty found at Gurna with other workmen such as *Hwri*, *Imn-nb* and *Imn-ms*.⁵² However, it is uncertain whether he is the same Paser who occurs as the father of Mehou in the next line.

L. 8. , Imn-m-b3.t

It is uncertain to whom this name belongs, whereas there are many individuals who bore the same name on ostraca found at Deir el-Bahri dated to the first half of the 18th Dynasty:
 1. Amenemhat who appears on an ostracon at Deir el-Bahri holding the title *T3w n Imn*, "the skipper of Amon".⁵³

2. Another Amenemhat occurs as *T3w*, "Reis"⁵⁴ on an ostracon from Deir el-Bahri.⁵⁵ He might be the same man who is attested on two ostraca from the tomb of Senmut, where he is mentioned as a supervisor of many of the workmen.⁵⁶

3. The servant *sdm* 's who appears on an ostracon dated to year 16 of Tuthmosis III.⁵⁷

4. The mason who is attested on an ostracon dated to year 49 of Tuthmosis III.⁵⁸

5. The workman who appeared on an ostracon from West Thebes with other workmen without any title.⁵⁹

L. 10. , Qn-Imn

This name is attested on many 18th Dynasty ostraca. Cf. ostracon no. 488, pl. 5, fig. 15-16.

Verso

L. 1. [...] , [...]T3wy

It could be part of a name, but the reading is uncertain.

L. 2.  , H'

Could be identified with the mason who occurred on an ostracon found at Deir el-Bahri dated back to the first half of the 18th Dynasty.⁶⁰

⁵⁰ RANKE, *PNI* I, p. 60-1. This name may seem like the Semitic names, which occurred in the ostraca of the 18th Dynasty, ALBRIGHT 1954, pp. 225-229. For more information about the Semitic names cf. ALBRIGHT 1954, no. 4, pp. 222-223; HAYES 1955, pp. 92-98; HOCH 1994; HAYES 1960, p. 41.

⁶⁰ HAYES 1960, pl. XIII, 20-7.

L. 3. : It is uncertain what this sign could represent, especially if the preceding number is correct, so it could not be a counterpart of the number. Presumably, this sign could be a signature of the scribe or used here as an “end sign” indicating that the text is finished.

O. Cairo DeB. No. 495

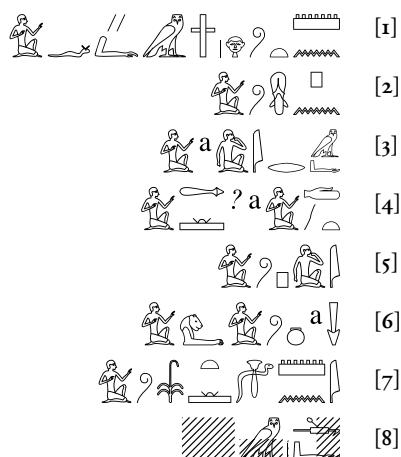

[PL. 3, FIG. 7-8]

Description

Provenance: Deir el-Bahri
Dimensions: H. 12 cm; W. 7 cm
Material: Limestone
Date: New Kingdom, 18th Dynasty
Current location: Egyptian Museum of Cairo

The ostracon contains eight lines with black ink on one side only. The text is written in thick and bold ink; however the handwriting is elegant, neat and readable. The text is not complete because the ostracon is broken at the end of the last line.

Hieroglyphic Transcription

Palaeographical Remarks

L. 3. : Despite the lack of sufficient details, it may represent the sign . This form is very close to the form of the P. Louvre E. 3226.⁶¹

61 MEGALLY 1971, pl. 1, g.

L. 4.  : Uncertain reading for  *drt*?

L. 6.  : It is likely to read as *sn*, but the above stroke is unusual.

- [7] *Amenwadjesou*
- [8] *Wâuem[...]*

Commentary

The text is considered to be a list of workmen. These names are written directly without a heading line.

L. 1.  , *Mnt.w-hr-wnmy=f*

As far as I know, this name was not known before in the documents of the 18th Dynasty especially at Deir el-Bahri and Deir el-Medina. Later in the 19th Dynasty, this name was given to one of Ramses II's sons.⁶² However, the section *hr-wny=f* occurred as a second part in the name of *P3-R'-hr-wny=f* dated to Ramesside Period as well.⁶³

L. 2.  , *P3-n-tbw*

This name is mentioned once again on a funeral cone along with the title *imy-r pr*.⁶⁴ However, it must be different person from our individual.

⁶² RÖMER 2014, p. 213.

Commentary

This text is a list of personal names written without any introductory formula or heading line. Most of these names occur on other 18th Dynasty ostraca originating from Deir el-Bahri, in addition to P. Louvre E. 3226, which bears the same characteristics.

L. 1. , *Nb-w'w*

This name is mentioned on an ostraca found at Deir el-Bahri holding the title *imy-r ihw*, “the overseer of the cattle.”⁶⁹ He might have been involved with other workmen, individuals, and institutions in the construction of Hatshepsut’s temple.⁷⁰

L. 2. , *Nb-sny*

cf. ostraca no. 518, col. 2, l. 3.

66 MEGALLY 1971, pl. XLVII, k.

67 MEGALLY 1971, pl. XL, c.

68 MEGALLY 1971, pl. XX, e.

69 HAYES 1960, pl. X, 9 rt. 9.

70 HAYES 1960, p. 34.

L. 3.  , *Qn-Imn*

Sometimes, this name is inscribed in another variant  , *Imn-qn*.⁷¹ This individual is mentioned as a mason on an ostracon from Deir el-Bahri dating to year 49 of Tuthmosis III⁷². The same name is written on an ostracon dated to the 18th Dynasty, and recording a message sent from him to the workman *Hry-ms*, discussing about masons.⁷³ *Qn-Imn* is mentioned on another ostracon from the tomb of Senmut without any titles,⁷⁴ in addition to a hieratic ostracon from Deir el-Bahri, where he is referred to as *Qn-Imn* of *thsw* (?).⁷⁵ Following what is mentioned above, one could identify him with the mason who appears on the ostracon of Deir el-Bahri that dated back to the year 49 of Tuthmosis III.

L. 4.  , *Sbk-ms* [...]

As far as I know, this name is not attested among the persons discussed on the 18th Dynasty ostraca of Hatshepsut and Tuthmosis III.

L. 5.  , *P3y*

Most probably he could be identified with the mason mentioned on an ostracon found at Deir el-Bahri and dated to the 18th Dynasty.⁷⁶

Commentary

L. 1. , *Dhwty-nfr*

This name is mentioned twice on an unpublished ostracon along with the title  *ss-qd.*⁷⁷ However, it was not commonly used among the published ostraca dated to the first half of the 18th Dynasty.

L. 2. , *Imn-htp*

This name could be identified with the draughtsman Amenhotep, who is attested together with Djehutynefer, who was himself mentioned on an unpublished ostracon now stored in the basement of the Egyptian Museum of Cairo.

O. Cairo DeB. No. 435

[PL. 4, FIG. 13-14]

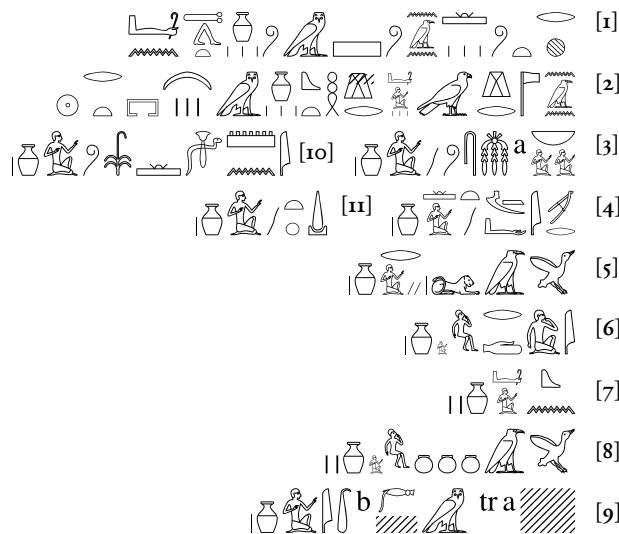

Description

Provenance: Deir el-Bahri
Dimensions: H. 12.5 cm; W. 10 cm
Colour: Dark brown
Date: New Kingdom, 18th Dynasty
Current location: Egyptian Museum of Cairo

This potsherd is inscribed in black ink on one side only. The text is almost complete and consists of eleven lines. The heading is in the first two lines. Because of the bad condition of the surface, there is some faintness at the beginning of the ninth line. The handwriting is thick, regular, and compact.

⁷⁷ Some draughtsmen were mentioned on this ostracon such as , . It is worth noting that there are two draughtsmen with the same name as

Hieroglyphic Transcription

Palaeographical Remarks

This text is written in administrative handwriting, which belongs to the 18th Dynasty style, when the handwriting was thick and bold. The scribe is a professional and is familiar with writing the variations of the signs.

L. 3, a. : This word is determined by two seated men. Normally, the determinative is a man and a woman. Perhaps, the scribe forgot to add the diacritic mark for the second sign.

L. 9, a. It is a much effaced sign that is very difficult to recognize. b. : The upper part could represent , however the lower sign is still illegible.

Commentary

This text contains information about the distribution of beer in *wšm*-vessels and enumerated the number of vessel for each workman.

L. 1. , *wšm*

The *wšm*-vessel was generally employed as storage for beer,⁷⁸ and later it was particularly used as a beer measurement.⁷⁹ This vessel first appeared in the 18th Dynasty,⁸⁰ in the form .⁸¹ Then, throughout the New Kingdom, its regular writing was ,⁸² or .⁸³ With some exceptions like .⁸⁴ The regular determinative of *wšm* is a vessel without handle, but in later times, especially in the texts of the 25th Dynasty, the determinative is representing a *situla* with a movable handle .⁸⁵ This kind of vessel was a high-walled vessel with a neck and a wide opening,⁸⁶ generally made of metal (silver or bronze).⁸⁷ However, in some cases it was made of gold.⁸⁸ J. Janssen mentioned that the *wšm* is quite small which agrees with its price. A clear price of bronze *wšm* is dated to the late 19th Dynasty, when its value equalled two *deben*, so J. Janssen concluded that while its exact value is uncertain, it remains fairly low.⁸⁹

L. 2. , *Hr.tyw-ntr*

Hr.tyw-ntr is the complete form of the abbreviated title *Hr.ty*, which means “masons”.⁹⁰ This title is a *nisbe* form of the old expression *Hr.t-ntr*, “god’s underground” or “necropolis”.⁹¹ This title is attested since the Old Kingdom, where it generally indicated the tomb builders. From the 18th Dynasty onwards, it has a specific meaning in which it referred only to the workmen who had the responsibility of cutting the stone and digging the royal tomb, which was hewn from solid rock.⁹² J. Černý considered *Hr.ty-ntr* as a rare title, because it was not

78 SPALINGER 2000, p. 315.

79 The *wšm* is close in shape to other measurements which were used also for beer like *qby*, *stt*, *ȝȝb*. محمد صلاح بن محمد محمد أحمد، المكابيل والموازن في مصر القديمة، رسالة ماجستير، غير مشورة، كلية الآثار جامعة القاهرة، ١٩٨٩، ص. ٦٦.

91 MEGALLY 1981, p. 310; *Wb* III, 394-14.

mentioned frequently on the ostraca of Deir el-Medina.⁹³ M. Megally justified this rarity for the type of documents, which recorded *Hr.ty-ntr* in Deir el-Medina. *Hr.tyw-ntr* is mainly written on reports on papyrus, but not on ordinary daily-life ostraca.⁹⁴ Furthermore, this rarity may have resulted from the fact that masons were considered in general as workmen among the crew of the tomb builders. So they were described in the documents as *rmt-ist*, and when they had a specific mission related only to them or had rations and rewards, they were described as *Hr.ty-ntr*. Perhaps, this is the reason why they are not frequently attested.

Duties of the masons in the New Kingdom

The gang of workmen included masons, carpenters, chief carpenters, sculptors, and draughtsmen. Each one of them was specialized in a certain phase of the creation of the royal tomb.⁹⁵ The role of the masons was starting once the site was chosen and when the plan was drawn up. They were cutting the royal tomb out of the solid rock.⁹⁶ Although, the main duty of the masons was to establish the royal tomb, some of them worked on the buildings in the temples of Luxor, Karnak and in the southern city during the Ramesside period.⁹⁷

As J. Černý mentioned, this specification in the southern city, or even more precisely at Karnak and Luxor, suggests that sometimes during the long reign of Ramesses II when his tomb was finished, the workmen were commandeered to the vast constructions of the king on the east bank.⁹⁸ That is why one can find more than one mason during the reign of Ramesses II adopting the title *Hr.ty-ntr*, among the other “servants in the place of truth”⁹⁹. Another possibility is that they were sent to quarry stones for the construction of the Theban sanctuaries in the sandstone-quarries at Gebel Silsila.¹⁰⁰ M. Bierbrier added that the talent of the workmen could be used for the benefit of other members of the royal family and it is certain that the craftsmen were employed to construct the highly decorated tombs of the royal wives and princes in the Valley of the Queens, such as the famous tomb of queen Nefertari, wife of Ramesses II. This fact can also be applied to the masons.¹⁰¹

Number of the masons

On one hand the number of masons among the crew was not stable. The variation in their numbers relates to the progress of the work in the royal tomb. The larger numbers meant that the work was beginning. On the other hand the small number indicates that the royal tomb had been completed or on its way of being completed so fewer workmen were required.¹⁰² In the field of work, the masons were under the authority of the vizier; this is referred to on an ostracon dated to King Tuthmosis III, when the masons worked under the direction of the vizier Rekhmere.¹⁰³ According to a hieratic ostracon dated to the 18th Dynasty, the masons were put under the direct control of the , “chief of masons”.¹⁰⁴

Commentary

This ostracon could be a necropolis journal. This kind of journal records the details of the daily work in the royal necropolis, such as the progress of the work in the royal tomb, the numbers of labourers, and their presence or absence. Usually the scribes used headings at the beginning to introduce such texts. However, the scribe of the present ostracon didn't pay attention to recording the date and didn't use any heading line, as well as not being interested in writing any notes in red.¹¹³ Presumably, most documents of this kind were considered temporary records, and would be recopied as permanent registers on papyrus.

¹¹⁰ MEGALLY 1971, pl. VI, b.

¹¹¹ HAYES 1960, pl. XIII, no. 63 rt.; pl. XIV, no. 67.

¹¹² MEGALLY 1981, pl. XXXVI. As for the point to be added over the head

of the bird, it is attested for the first time during the Middle Kingdom, in P. Brooklyn no. 351446, and continued to be in use until the beginning of the 18th Dynasty. The first example of this

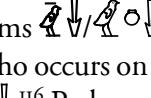

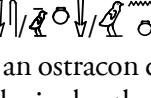

point during the 18th Dynasty is dated to Queen Hatshepsut, and it was also found on an ostracon uncovered in the tomb of Senmut. MEGALLY 1981, p. 295.

¹¹³ MEGALLY 1981, p. 298.

L. 2. *n3 n hr.tyw-ntr iw.w bn=k*

The information about absence from or presence at work in the royal tombs is often included in the necropolis journal.¹¹⁴ The phrase under discussion perhaps has three meanings: the first one could that the masons were already absent from work that day; the second could that they had already attended to their work that day, but didn't participate with their group of masons in a certain task; and the last one could that they attended the work but had another mission to be carried out.

L. 3.  *Šnw*

This name is written in variant forms   ¹¹⁵ Maybe this individual can be identified with the mason who occurs on an ostraca dated to year 49 of Tuthmosis III at Deir el-Bahri, in the form of  ¹¹⁶ Perhaps he is also the same person who is mentioned on an ostraca from Deir el-Medina dated to the 18th Dynasty among other workmen.¹¹⁷

L. 4.  *Qn-Inn*

cf. ostraca no. 475, l. 3 (pl. 3, fig. 9-10).

L. 6.  *Nbt-Mnw*

This name is mentioned in the P. Louvre E. 3226.¹¹⁸

L. 7.  *Snrk3* ¹¹⁹

It is clear that this is a Nubian name.¹²⁰ It is usual to find foreigners among the Egyptian workmen, e.g. a Nubian mason is attested on an ostraca found at Deir el-Bahri.¹²¹

Translation:

- [1] *Yamou to the*
- [2] *Royal Palace* (i.e. Great House), *wdnt-bread: i khar.*
- [3] *Bread: dint-basket i [...]*
- [4] [...]tr. [...]tr.

Commentary

Presumably this text is a list of contributions from the official Yamou to the Royal Palace. This sort of supplies for temples and palaces has been known before.¹²² It has been noted that most of the supplies that were offered by officials on the ostraca of Deir el-Bahri were kinds of baked products. In addition they were in small amount.¹²³

¹²² Cf. HAYES 1960, pl. XI, no. 9 rt.

¹²³ HAYES 1960, pl. XI, no. 9 rt.

cf. ostracon no. 448 vs.

L. 1.  *Im.w*¹²⁴

The official Yamou was known as an overseer of the Treasury at the time of Amenophis I.¹²⁵ However, it is not certain whether the Yamou of the present text is the same man of the time of Amenophis I and still live in the time of Hatshepsut and Tuthmosis III.

L. 2.  *Pr-'*³

It seems that, in this case, this term points to the royal palace rather than the pharaoh. *Pr-*'³ is mentioned in a list of supplies presented for the preparation or upkeep of the tomb of Senmut. However, it was written in the form , , adding the sign  as determinative.¹²⁶

O. Cairo DeB. No. 448

[PL. 6, FIG. 19-22]

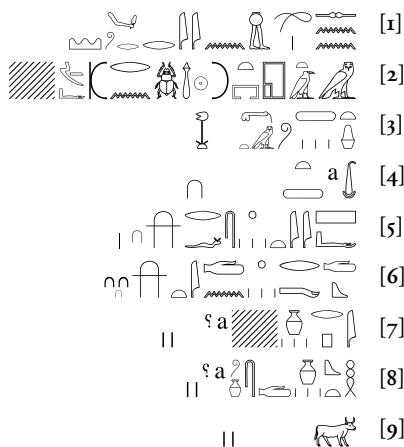

Description

Provenance:	Deir el-Bahri
Dimensions:	H. 12 cm; W. 7.5 cm
Material:	Potsherd
Date:	New Kingdom, 18th Dynasty
Current location:	Egyptian Museum of Cairo

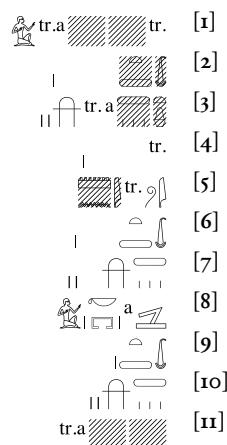

The ostracon is inscribed in black ink on both sides. The recto is written in nine lines, including the heading on the first two lines. The text is complete; however the ink is frequently faint in some parts. The verso, which consists of eleven lines, is incomplete. Most of the signs are wiped out especially in the first seven lines; furthermore, the last line is completely erased.

Hieroglyphic Transcription

Recto

Verso

¹²⁴ RANKE, *PNI*, pp. 25–14.

¹²⁵ HELCK 1958–1975, pp. 345, 466. It is worth noting that this name is entered

as apart in the name of the official

 *Im.w-ndb* in the time of Tuthmosis III. NAVRÁTILOVÁ 2007, p. 32.

¹²⁶ HAYES 1960, pl. XI, no. 14 rt.

Hayes in the two cases translated it as “Pharaoh”, p. 41.

Palaeographical Remarks

It seems that the text on both the recto and verso was written by the same scribe. The inscriptions represent the characteristics of the 18th Dynasty handwriting, most probably from the time of Hatshepsut and Tuthmosis III.

Recto

L. 4, a. : It stands for , which occurred also on the verso in lines 2, 6, and 9. This writing as seen in the following table is far from its ordinary shape, and is very close to the sign :

	 Ostracon. 448.	 HAYES 1960, pl. IX, 9rt.	 MEGALLY 1971, pl. XVI, K. 6.
	 MÖLLER 1927b, 383		

The writing technique of this sign  is different from the sign . However, it seems that the scribe was confused here between the two signs. Any parallels for this sign dating back to the time of Hatshepsut and Tuthmosis III are uncertain.

L. 7. a. The second part of this line escapes me.

L. 8. a. I am not confident in my reading for this group as *ds*, because the sign is written here in an odd form, and the whole word is written in an uncommon arrangement.

Verso

L. 1. a. Faint traces probably refer to a name.

L. 3. a. This line is very faint. However, based on the visible traces, one could read the first and the last group, while the middle group is difficult to understand.

L. 5. a. The last three signs could be restored as *Imn*.

L. 8. a. : It could represent the sign , where it is written in the form of middle hieratic.¹²⁷

L. 11. a. The whole line is wiped except for a few traces at the very end that could be part of a number.

¹²⁷ MÖLLER 1927a, 467.

Commentary

The recto contains a list of supplies presented by the temple of Tuthmosis II to Hatshepsut's temple at Deir el-Bahri. The verso contains supplies and offerings from the officials of Hatshepsut to her temple as well.

Recto

L. I.  , *i ny(.t)*

For this verb refers to movements, it was highly used by the administrative vocabulary and, as such, in delivery account formulae.

L. 2. , *Hw.t S3-hpr-n-R*

The temple of Tuthmosis II, which is located to the north of Medinet Habu,¹²⁸ was called *Šsp.t-‘nb* or *Hw.t Šsp.t-‘nb*,¹²⁹ “Chapel of life”.¹³⁰ This ostracon clarified the economic role that was played by temples throughout the New Kingdom. Through the 18th Dynasty documents, as well as in the Ramesside Period inscriptions, it has been revealed that the temple was a self-sufficient economic unit,¹³¹ powerful enough to meet its own requirements and contribute to the offering-cult in the great temple of Amon at Karnak. In addition to its support to other institutions like the community of workmen at Deir el-Medina,¹³² it also supported other temples under construction. It is worth noting that the temple was considered to be a kind of economic organization that contained a productive workshop called *šn'*, which was responsible for the production of their requirements.¹³³

L. 3. , *t-wm.t*

The total number of names of bread that occurred throughout the New Kingdom texts was about 97, of which almost 50 are attested for the first time while the others are known from earlier periods.¹³⁴ The loaves varied in size, shape (oval, round, conical), decoration, and also had special flavours.¹³⁵ The word *t* refers to bread in general,¹³⁶ while sometimes it was preceded by adjectives – more than 20 – forming new types of bread. Sometimes these names of bread describe their shape, size, colour or their ingredient, e.g. *t-‘*, “great bread”; *t-nfr*, “good bread”; *t-hd*, “white bread”; *t-n-‘t*, “barley bread.”¹³⁷ Probably the very uncommon name *t-wm.t*, that means “thick bread”¹³⁸ is used to describe the size or the shape of the bread. Presumably, this thick-bread is similar to the well-known bread called “Eish ash-Shams” and still eaten in Upper Egypt.

L. 4. , *wdn.t*

This term occurs on some ostraca from Deir el-Bahri precinct, relating to the Djeser-Djeserou and its builders.¹³⁹ This word is written in several forms ,¹⁴⁰ ,¹⁴¹ ,¹⁴² .¹⁴³ Maybe, the name refers to the typical offering bread.¹⁴⁴ The shape of this loaf is uncertain; perhaps it was a small object, probably a roll rather than a loaf.¹⁴⁵

L. 5.  , *s̄y.t*

This kind of cake was one of the most important and popular foods mentioned through the ancient Egyptian texts. The word *S̄y.t* is attested for the first time in the tomb of Khâbausoker at Saqqara (3rd Dynasty, Old Kingdom),¹⁴⁶ and continued to be used until the end of the New Kingdom.¹⁴⁷ It was a regular type of delivery by the memorial temple where it occurs among the daily and festival offerings together with grain products. This cake was made of emmer, mixed with fat and honey, it was thus an expensive product.¹⁴⁸

L. 5.  , *srf*

Adjective meaning “warm.” When it comes with cake, it could simply mean “fresh cake”.¹⁴⁹

L. 6.  , *dqr.w*

Fruits were an important part of the ancient Egyptian diet along with the cereal products, and vegetables.¹⁵⁰ The word *dqr.w*, “fruits”,¹⁵¹ is attested for the first time in New Kingdom texts.¹⁵²

Verso

The verso probably contains an offering list of four officials to Hatshepsut’s temple. This kind of private donation (concentrated mainly on bread) to this temple was known before and occurs on an ostraca uncovered inside the temple itself.¹⁵³ According to W. Hayes, the foregoing list would be recopied onto a permanent register, e.g. papyrus, and duplicated in the temple records.¹⁵⁴ At the same time, it is an indication that the temple was operating and receiving offerings from Hatshepsut’s officials and their families.¹⁵⁵

L. 8.  , *Grgzk pr*

As far as I know this individual is not known in the 18th Dynasty texts, especially in those of Hatshepsut and Tuthmosis III.

O. Cairo DeB. No. 384

¹⁵⁵ HAYES 1960, p. 37.

The ostracon is inscribed in black ink on one side only. The text consists of five incomplete lines, because the ostracon is broken on the right side. The surface is in a bad state of preservation, so the ink is very faint in many parts of the text. The handwriting is regular, neat, and elegant.

Hieroglyphic Transliteration

Palaeographical remarks

L. 1. a. : Reading of this part is difficult. However, its position indicates to be a part of a heading.

L. 2. a. : The reading of this group escapes me.

L. 3. a. : The writing of this title is similar to the 18th Dynasty handwriting especially to Hatshepsut, and Tuthmosis III, e.g. .¹⁵⁶ .¹⁵⁷

L. 4.a. : Because of the breakage and the faintness, the reading of these signs is still uncertain. However, it could represent a name due to the existence of the seated man as a determinative at the end, or it could be the second part of the title *k3mw*, "gardener".¹⁵⁸

Transliteration

- [1] [...]... (?)
- [2] [...]... *n3 n i3b(.w)* [...] 5
- [3] [...]... *pr i3my-r b3tm* ... 5

Translation

- [1] [...]... (?)
- [2] [...]... *the cattle* [...] 5
- [3] [...]... *House of the overseer of the treasures* ... 5
- [4] [...]... (?) of (Aakheperenrâ) that is 4
- [5] [...] *King of upper] and lower Egypt (Aakheperenrâ)*, total 5 [...]

Commentary

Due to the breakage, in addition to the faded parts, it is not possible to grasp the entire meaning. However, the subject is similar to other texts found at Deir el-Bahri dated to the 18th Dynasty. It could be a list recording contributions and supplies from various institutions, individuals, and towns to the construction of Hatshepsut's temple,¹⁵⁹ or at least to the preparation of Senmut's tomb.¹⁶⁰

L. 3. , *pr ỉmy-r btm*

As far as I know, this term is used in one 18th Dynasty ostracon of Deir el-Bahri, with other officials, e.g. *ỉmy-r pr tȝw*, in a list of contributions to the temple of Hatshepsut.¹⁶¹ However, the title *ỉmy-r btm*, “Overseer of the treasure”, occurred many times in lists of supplies and contributions to the temple of Hatshepsut and in the tomb of Senmut as well.¹⁶² It has been noted that the highest amount of supplies in these lists belonged only to the overseer of the treasure.¹⁶³

L. 5. , *‘ȝ-bpr-n-R*

The royal name ‘ȝ-bpr-n-R’, “Tuthmosis II”, is almost not attested in Deir el-Bahri except in ostracon no. 448 (pl. 5, 6, fig. 17-20) of the current paper.

O. Cairo DeB. No. 482

[PL. 7, FIG. 25-26]

Description

<i>Provenance:</i>	Deir el-Bahri
<i>Diameter:</i>	9.5 cm
<i>Base:</i>	4.5 cm

¹⁶¹ HAYES 1960, p. 35, pl. X, no. 8.

¹⁶³ HAYES 1960, pl. XI, no. 14.

others are missing, especially in the first and third lines on the edge of the bowl. There are also some faint signs at the end of the third line that make it difficult to read.

Hieroglyphic Transliteration

Palaeographical Remarks

L. 3, a. At the end of this line, a few signs are faint and difficult to read. Possibly they relate to the scribe Djehwty-Tety or it may also give the reason why his amount of barley is less than that of the scribe Hori.

L. 4, a. Abbreviated and unusual writing for the name Hor(i).¹⁶⁴ There are no details at all except the two legs. It is worth noting that the name is written without any determinative.

Transliteration

- [1] *ʒbd ʒʒb.t sw 19*
- [2] *rb.t it nty sšm.w*
- [3] *sš Dhwty-Tty it 34 ... (?)*
- [4] *sš Hr(i) it 64*

Translation

- [1] *The third month, Akhet season, day 19*
- [2] *Amount of barley which is delivered (distributed) (to)*
- [3] *Scribe Djehouty-tety: barley 34 ... (?)*
- [4] *Scribe Hor(i): barley 64*

Commentary

The text records a distribution of barley for two scribes, as it presents their names accompanied with their shares of barley.

L. 3. *Dhwty-Tty*

As far as I know, this name was not known before in the text of Deir el-Bahri.

¹⁶⁴ Compare the similar writing of the falcon as a part of the name (*Hr-nf*), cf. GRANDET 2010, no. 10125.

L. 4. *𓁵*, *Hr(i)*

Maybe this name is identified with the scribe Hori who is attested on an ostracon from the tomb of Senmut.¹⁶⁵ He is also mentioned on an ostracon found in Gurna dated to the 18th Dynasty together with the workman *Imn-nb.*¹⁶⁶

O. Cairo DeB. No. 486

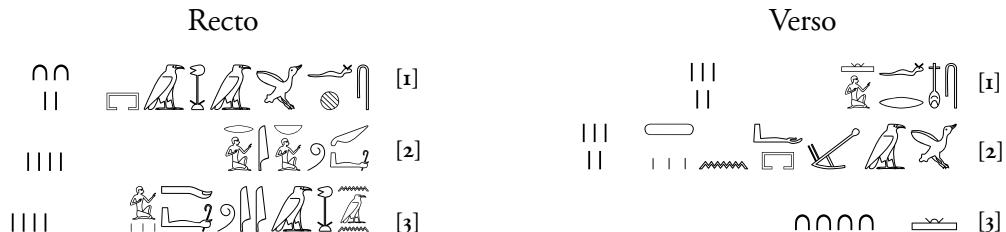

[PL. 8, FIG. 27-30]

Description

Provenance: Deir el-Bahri
Dimensions: W. 8 cm; H. 6.5 cm
Material: Flint
Date: New Kingdom, 18th Dynasty
Current location: Egyptian Museum of Cairo

The text is written in red ink on both sides. The recto and the verso consist each of three lines. The handwriting is clear and readable. The ink is thick, and heavy on the both recto and verso.

Hieroglyphic Transcription

Transliteration:

Recto	Verso
[1] <i>sfb p3 b3</i>	22 [1] <i>Snfr</i>
[2] <i>sšm Nb-iry</i>	4 [2] <i>p3 šn' n 'q.w</i>
[3] <i>n3 n b3y.w</i>	4 [3] <i>dmd</i>

¹⁶⁵ HAYES 1960, pl. XVII, no. 83-6.

¹⁶⁶ GOEDICKE, WENTZ 1962, pl. LXXXVII, no. 56 rt.

Translation

Recto	Verso
[1] removing the hall? 22	[1] <i>Sennofer</i> 5
[2] the leader (of the team) Nebiry 4	[2] the storehouse of the bread 5
[3] the measurers 4	[3] total: 40

Commentary

Presumably this text is a list with the number of workmen assigned to special missions or duty. Unfortunately, the text did not provide enough information about the nature of this work. However, the numbers before the entries could indicate the number of men involved in the work. In addition, at the end of the text, the whole workforce of about 40 men was calculated by the scribe. It is worth noting that some expressions of the present ostracon were not in common use in the published texts dated to the 18th Dynasty, especially those of Deir el-Bahri.

Recto

L. 1. , *sfb p3 b3*¹⁶⁷

This expression is different from the known , *sfb n b3*, “used tool”. Most probably the meaning here is “removing the hall”. Maybe the text refers to a process of removing a construction by this large number of workmen.

L. 2. , *ssm*

Perhaps refers to the leader of the team or at least the leader of his group. However, this title was not in common use through the texts of the 18th Dynasty with this specific meaning.

, *nb-ir(y)*

This name could be a variant of the name Nebiry, who occurred on two 18th Dynasty ostraca dated to the time of Hatshepsut and Tuthmosis III.¹⁶⁸

L. 3. , *n3 n b3y.w*

This term means “measurers”,¹⁶⁹ and could refer to the people who measure the lands before the construction or during the work.

¹⁶⁷ According to the Berlin Dictionary, the word *b3* that is determined by means “hall” *Wb* III, 221-18. So that it could refer to “building” rather than “tool or chisel”.

¹⁶⁸ ČERNÝ 1935; ČERNÝ, GARDINER 1957, pl. XX, 5.

¹⁶⁹ *Wb* III, 223-23, HANNIG 1995, p. 579, LESKO 2002a, p. 344.

Verso

L. I. <img alt="Hieroglyphs for the name Snfr: a seated figure, a wavy line, a fish, a staff, and a reed." data-bbox="111 100 300 135}, <i>Snfr

He could be identified with the individual Senofer (cf. ostracon, 407, l. 4 rt., pl. 2). It is worth noting that the writing of this name is different from any other known form of the name: it is written  instead of the sign .¹⁷⁰

L. 2.   , *pʒ řn' n 'qw*

The text refers to five men who were assigned to the storehouse of the bread. Maybe this storehouse is located in the royal palace or somewhere in the temple.

O. Cairo DeB. No. 434

[PL. 9, FIG. 31-32]

Description

Provenance: Deir el-Bahri

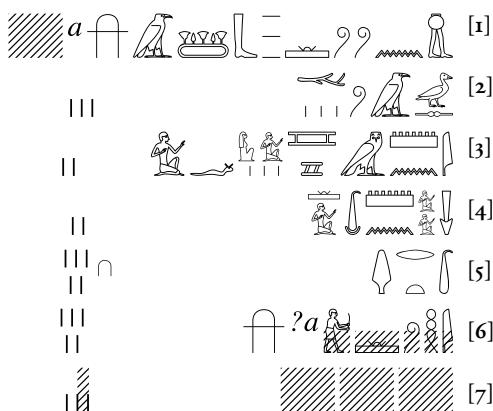

Dimensions: H. 10 cm; W. 7 cm

Date: New Kingdom, 18th Dynasty

Current location: Egyptian Museum of Cairo

Limestone ostracon inscribed in black ink on one side only. The text consists of seven incomplete lines. The ostracon is broken on the lower part, and slightly broken on the left side. The handwriting is thick, elegant, clear, and readable.

Hieroglyphic Transcription

170 HAYES 1960, pl. XIII, 63 rt.

Palaeographical Remarks

L. 1, a.  : Presumably stands for f .

L. 6, a. Perhaps the broken part could be restored, with more caution, as          <img alt="Hieratic sign for a person" data-bbox="2695 165 27
