Some 18th Dynasty Hieratic Ostraca from Deir el-Bahri

Khaled Hassan

The present paper deals with a group of hieratic ostraca stored in the basement of the Egyptian Museum of Cairo. These ostraca are written in black and red ink. Unfortunately, the available data concerning the exact find spot of these ostraca in the museum’s registers are very few. According to a brief note found inside the box, these ostraca were perhaps uncovered during the excavations of the Metropolitan Museum by H. Winlock at Deir el-Bahri between 1911 and 1931, either from the north-east side of the court of the Hatshepsut temple or from one of the Naville’s dumps.¹ Their topics vary between lists of names, distribution of beer in wšm-vessels, and list of supplies presented by the temple of Tuthmosis II to Hatshepsut temple, in addition to a necropolis journal for workmen. Presumably these workmen were involved in establishing royal buildings in the area of Deir el-Bahri and the Valley of the Kings. According to the topics as well as the palaeography of the texts, these ostraca are probably to be dated from the first half of the 18th Dynasty.

¹ For more information about these dumps cf. Winlock 1942, p. 68; Hassan 2013, p. 183.
O. Cairo DeB. No. 518

Description

Provenance: Deir el-Bahri
Dimensions: H. 13 cm; W. 7.5 cm
Material: Limestone
Date: New Kingdom, 18th Dynasty
Current location: Egyptian Museum of Cairo

This ostracon is written in black ink on one side only. The text is complete in two columns. The first one consists of eleven lines, starting with the heading. The second column consists of four lines only. The ink is faint in some places; nevertheless the handwriting is neat and readable in most of the text.

Hieroglyphic Transcription

Col. 2

Col. 1

This number represents the serial number that has been assigned by a team of the Cairo University, the author was one of this team, who was authorized to make a classification of the whole ostraca that are housed in the basements of the Egyptian Museum of Cairo, and does not relate to the entry or the temporary numbers of the museum’s registers. It is worth mentioning that these ostraca are not recorded in the registers of the Cairo Museum.
Palaeographical Remarks

Col. 1

L. 2, a.: It is very faint, but it could be part of the name.

L. 3, a.: Perhaps stands for the sign \( \text{\textlangle sign}} \), rather than the sign \( \text{\textrangle} \).

L. 4, a.: It represents the group \( \text{\textlangle group}} \) in the name of Įmnn. Compare the same group in the name of Įmn-htp in l. 9.

L. 6, a.: Uncertain form of \( \text{\textlangle uncertain form}} \).

L. 7, a.: It could stand for the group \( \text{\textlangle group}} \).

Col. 2

L. 3, a.: It represents the group \( \text{\textlangle group}} \) in the name of Nb-sny.\(^4\)

L. 4, a.: The number is not clear, but according to the sum of the names most probably to be read as 12.

Commentary

As stated in the headline, the text is a list of workmen. As the ostracon came from Deir el-Bahri, these workmen could be involved in the construction of the temple.

Col. 1

L. 4. 𓊕 𓊕, Nb-Ỉmn

This name has two forms 缙 nb or Nb-缙. It is clear that there was more than one individual who had the same name, such as the scribe Nebamon who occurred on an ostracon found in the tomb of Senmut (no. 71) at Deir el-Bahri. This name also appears on an ostracon, alongside the serfs “mrw”, dated to year 10 of Tuthmosis III and found in the second court of Hatshepsut’s Temple. Nebamon also occurred on two ostraca without titles; one came from Gurna, and the other from Deir el-Medina. It is difficult to determine which one of the previous names could be identified with our Nebamon.

L. 5. 𓊙 𓊙 𓊙, Dżb

This name has many variations like 𓊙 𓊙 𓊙 𓊙 𓊙 𓊙 𓊙 𓊙 𓊙 𓊙 𓊙 𓊙 𓊙 𓊙 𓊙 𓊙 𓊙. Perhaps, he is to be identified with the scribe Dżb who is attested in the visitors’ graffiti written on the walls of the tomb of Antefoker.
L. 6. \(\text{_third char from left, Tnnw}: (?)\)

Maybe this writing stands for the name of the workman \(\text{Tnnw}\), who occurred on hieratic ostraca dated back to the 18th Dynasty,\(^{12}\) among other names, e.g. \(\text{Nb-bry, H nw, and Nbd}\).

L. 8. \(\text{Tiwy}\)

This name could be specified for the scribe \(\text{Tiwy} (\text{Teye})\) who is attested on an ostracon found in the tomb of Senmut.\(^{13}\) Possibly, he is the same person who is appearing on an unpublished ostracon from Deir el-Bahri.\(^ {14}\)

L. 9. \(\text{Imn-hhp}\)

This was a common name during the first half of the 18th Dynasty, where many individuals bore the same name, such as the scribe Amenhotep who is attested on two hieratic ostraca from Deir el-Bahri.\(^ {15}\) Another Amenhotep son of Suner, served as chief masons.\(^ {16}\) The henchman\(^ {17}\) Amenhotep was mentioned on an ostracon found in the tomb of Senmut.\(^ {18}\) Furthermore, this name is mentioned twice on an ostracon that was found in Deir el-Medina but without any titles.\(^ {19}\) It is difficult to determine which one could be identified with the Amenhotep of the present text.

L. 10. \(\text{Mb}\)

This name could be identified with the mason \(\text{Mb}\), who is attested on an ostracon from Assasif with other masons such as \(\text{Mnw, Ms}w, \text{P} \text{-} \text{idn, Nfr-Hyw}\).\(^ {20}\) He is also described as a mason on an ostracon found in the Temple of Hathepsut and dating to year 49 of Tuthmosis III.\(^ {21}\) Furthermore, he is mentioned on two other ostraca from Deir el-Medina dated to the same period.\(^ {22}\)

L. 11. \(\text{bšȝ}\)

This name could be identified with the workman \(\text{bšȝ}\) who is attested on many ostraca dating back to the 18th Dynasty, all of them were found in the tomb of Senmut, and each name is preceded by the title \(\text{brty, “mason”}\).\(^ {23}\)

Col. 2

L. 1. \(\text{Nḫt}\)

This name could be identified with the foreman \(\text{Nḫt}\). He is attested on an ostracon dated back to the reign of Tuthmosis III from Deir el-Bahri as stated in the following text: “Work of this day, those who carried Earth in Djeserou under the direction of Nakht: 8 men.”\(^ {24}\) If he was the same person, the present text could possibly be dated to an earlier period when \(\text{Nḫt}\) had not yet been promoted to foreman.

\(^{12}\) Černý 1935.

\(^{13}\) Hayes 1960, pl. XXIII, no. 130.

\(^{14}\) This unpublished ostracon found at Deir el-Bahri (stored in the basement of the Egyptian Museum of Cairo, no. 440) belongs to the group of Mrs. Rasha Isaac (Ain Shams University) as a topic of her PhD thesis. This text mentions the individual \(\text{bšȝ}\) with other workmen like \(\text{Mḥ}\) and \(\text{Nb-bry}\).

\(^{24}\) Hayes 1960, p. 32, pl. IX.
L. 2. 𓊄𓊪𓊄𓊫 Wsr-hzt

Maybe, this name could be identified with the mason Wsr-hzt who occurred with the mason Mḥ on an ostraca found in the tomb of Senmut.25

L. 3. 𓊮𓊪𓊣𓊮𓊮, Nb-sny

This name has been written in many forms / in addition to . At least five individuals bearing this name are attested during the first half of the 18th Dynasty.27 This name is mentioned alongside other 18th Dynasty workmen on an ostraca found at Deir el-Medina, but without any titles.28 The herdsman Nebseny appeared with another herdsman on an ostraca dated to year 46 of Tuthmosis III.29 Another Nebseny occurred on an ostraca found at Abydos dated back to the 18th Dynasty.30 Furthermore, two names are mentioned on papyrus Louvre E. 3226,31 one of them holds the title šs.32 In later times, this name is attested on papyri dating back to Amenhotep II with his son Hzt.33 It is worth noting that any identification of Nebseny of the present ostraca with any of the previous mentioned individuals is uncertain.

O. Cairo DeB. No. 407

Description

Provenance: Deir el-Bahri
Dimensions: H. 11 cm; W. 7.5 cm
Material: Limestone
Date: New Kingdom, 18th Dynasty
Current location: Egyptian Museum of Cairo

The ostraca is inscribed in black ink on both sides. The recto consists of ten lines. The ink is very faint in many parts of it. The first line, which is considered the heading line, is incomplete and some signs are missing. The dirt on the lower part of the recto and the poor condition of the surface makes it difficult to read some words. The verso consists of three lines, the first two lines are broken and many signs are missing as well.

---

26 Ranke, PN I, pp. 186-14.
27 He occurred on an unpublished ostraca from Deir el-Bahri, (it belongs to the group of Rasha Isaac), with other workmen such as ḫmn-hżt, ḫmn-Pȝ Qn, Dhwty.
28 Černý, Gardiner 1957, pl. XVI, 6.
29 Černý, Gardiner 1957, pl. XLVI, 1.
31 P. Louvre E. 3226 is one of the longest surviving 18th Dynasty administrative papyri; it consists of 61 pages. It recorded the movement of two cargo ships traveling along the Nile Valley and dealing in dates and grain (Quirk 2001, s.v. “The Administrative Texts”, p. 25).

According to the palaeography, the handwriting bears the same features as the 18th Dynasty ostraca of Deir el-Bahri, as well as that of the P. Louvre E. 3226:

Recto

L. 1, a. The beginning of the dating formula is lost, so that the year number is uncertain.

b. : it could represent as a part of the year number. Usually, the complete formula of the date was composed of year, month, and day. However, I am not inclined to read this sign as 'month four,” because the form of this group in the date is different from the present shape. The usual writing is .

L. 2, a. : Despite the faintness of the lower part of the sign, it is likely to represent the animal of Seth . It seems that the scribe overstated in his writing for the animal’s tail, as the usual form of the animal is .

L. 3, a. : Based on the remaining traces, one could restore the word to read . This form is similar to the handwriting of P. Louvre E. 3226 .

34 Hayes 1960, pl. XIII, nos. 62-1, 63
35 Grandet 2010, nos. 10145, 10173, 10176, 10179 lt., 10780 vs., 10200, 10201 lt.
36 Möller 1927b, 144.
37 Megally 1971, pl. XLIX, L.
L. 4, a. \(\text{ligature}\): The two seated men are ligatured in this line, which is very similar to parallel examples found in the tomb of Senmut.\(^ {38} \) It represents the repetition sign \(\text{ditto}\) which was often used to indicate a repetition of the above word or phrase \(\text{ditto}\). This repetition sign has many other forms such as \(\text{ditto}\),\(^ {39} \) \(\text{ditto}\),\(^ {40} \) \(\text{ditto}\),\(^ {41} \) \(\text{ditto}\),\(^ {42} \) and sometimes the sign \(\text{ditto}\) was used as well. c. The second half of this line is problematic. However, a few traces suggest that the first group could be read as \(\text{ditto}\).

L. 5, a. The second half of this line is difficult to transcribe, but the three final signs \(\text{ditto}\) could be \(\text{ditto}\).

L. 6, a. \(\text{ligature}\): Very rubbed traces, therefore it is difficult to recognize. c. \(\text{ditto}\): it could represent \(\text{ditto}\), although the back of the sign is rubbed (compare the same sign in l. 7). The sign below could represent \(\text{ditto}\), as a determinative of the name, which is possibly written underneath due to insufficient space at the end of the line.

L. 8, a. \(\text{ligature}\): It represents the group \(\text{ditto}\), however, there is an unusual sign above \(\text{ditto}\) that is still inexplicable. b. \(\text{ditto}\): This ligature suggests \(\text{ditto}\), which represents the last part of a father’s name. However, there are no noticeable traces before it.

L. 9, a. \(\text{ligature}\): Reading of this group suggests \(\text{ditto}\), while the last few signs of the line are very faint. Unfortunately, the traces are not enough readable to transcribe them.

Verso
L. 1, a. \(\text{ligature}\): Perhaps stands for \(\text{ditto}\), however, the lower part of the sign is still inexplicable.

L. 3, a. \(\text{ligature}\): The reading of it escapes me.

Commentary

This text contains a list of attendance of workmen, accompagned here with the names of their fathers. This kind of parentage list was not in common use among name lists.44

Recto

L. 2. Ḫ hatch, Sth

As far as I know, this individual did not occur on any ostraca of the 18th Dynasty; especially those dated to the first half of the 18th Dynasty at Deir el-Bahri, i.e. Hatshepsut and Tuthmosis III.

L. 3. Ḫ hatch, Swi-rs

It is uncertain whether he is the same scribe Senires, who appears in the P. Louvre E. 3226, which is dated to the 18th Dynasty.45

L. 4. Ḫ hatch, Sni-i-nfr 46

This name could be identified with the workman Sennofer who occurred on many ostraca found in the tomb of Senmut at Deir el-Bahri.47 This individual was mentioned as a workman who was responsible for smoothing the walls of the tomb ḫr Ḫ ʿʿ.48 He is also attested on another ostracon from the same tomb holding the title ṭwȝ.w, “shorer”.49

---

44 A similar list dated to the 18th Dynasty has been published by Černý, Gardiner 1957, pl. XVI, 5. Most of the names are acompanhied in the names of their fathers. However, one or two names are inscribed in the names of their mothers, while a few names are still without second name.

46 It is worth noting that this name is different from Sennofer, who occurred in P. Louvre E. 3226. Sennofer of P. Louvre E. 3226 is mentioned holding the title inn-r Ḫwḥwt, “Chief of the grain treasury”. Megally 1977, p. 280. This man kept his position until year 32 of Tuthmosis III, and many years under Queen Hatshepsut. Megally 1977, pp. 280-281. For more information cf. Helck 1958-1975, pp. 348-351.

L. 5. ʿbȝ 50
This name could be identified with the workman ʿbȝ, who is attested on two necropolis journals ostraca along with well known 18th Dynasty workmen. It is worth noting that ʿbȝ was recorded as the first name in the lists with the highest amount of rations among the other workmen. It could be a probable indication that he served as a senior of this group or perhaps, at that time, he was not a young man or at least he was the oldest of them.

L. 7. Pȝ-sr
This name could be identified with the individual Paser who occurred on an ostracon dated to the 18th Dynasty found at Gurna with other workmen such as Ḥwrt, Īmn-nb and Īmn-ms. However, it is uncertain whether he is the same Paser who occurs as the father of Mehou in the next line.

L. 8. Īmn-m-hȝ.t
It is uncertain to whom this name belongs, whereas there are many individuals who bore the same name on ostraca found at Deir el-Bahri dated to the first half of the 18th Dynasty:
1. Amenemhat who appears on an ostracon at Deir el-Bahri holding the title Tȝw n Īmn, “the skipper of Amon”.
2. Another Amenemhat occurs as Tȝw, “Reis” on an ostracon from Deir el-Bahri. He might be the same man who is attested on two ostraca from the tomb of Senmut, where he is mentioned as a supervisor of many of the workmen.
3. The servant sḏm ḥ on an ostracon dated to year 16 of Tuthmosis III.
4. The mason who is attested on an ostracon dated to year 49 of Tuthmosis III.
5. The workman who appeared on an ostracon from West Thebes with other workmen without any title.

L. 10. Qn-Īmn
This name is attested on many 18th Dynasty ostraca. Cf. ostracon no. 488, pl. 5, fig. 15-16.

Verso
L. 1. [...] Tȝwy
It could be part of a name, but the reading is uncertain.

L. 2. Ḫʿ
Could be identified with the mason who occurred on an ostracon found at Deir el-Bahri dated back to the first half of the 18th Dynasty.

---

Commentary

The text is considered to be a list of workmen. These names are written directly without a heading line.

L. 1. Mnt.w-ḥr-wnmy⸗f
As far as I know, this name was not known before in the documents of the 18th Dynasty especially at Deir el-Bahri and Deir el-Medina. Later in the 19th Dynasty, this name was given to one of Ramses II’s sons. However, the section ḏr-wnmy⸗f occurred as a second part in the name of Pȝ-Rʿ-ḥr-wnmy⸗f dated to Ramesside Period as well.

L. 2. Pȝ-n-ṯbw
This name is mentioned once again on a funeral cone along with the title îmy-r pr. However, it must be different person from our individual.

Palaeographical Remarks

L. 2, a. ٣٩٣٩٣٩: The handwriting of the group ٣٩٣٩٣٩ is similar to the forms of P. Louvre E. 3226, ٣٩٣٩٣٩ (cf. l. 5 too).

L. 3, a. ٣٩٣٩٣٩: One could conclude that the group ٣٩٣٩٣٩ is identical with the group of the P. Louvre E. 3226, e.g. ٣٩٣٩٣٩٣٩٣٩.

L. 4, a. ٣٩٣٩٣٩: The transcription of this group is difficult to give.

Commentary

This text is a list of personal names written without any introductory formula or heading line. Most of these names occur on other 18th Dynasty ostraca originating from Deir el-Bahri, in addition to P. Louvre E. 3226, which bears the same characteristics.

L. 1, ٣٩٣٩٣٩٣٩, Nb-wʻ.w

This name is mentioned on an ostracon found at Deir el-Bahri holding the title \textit{imy-r ihw}, “the overseer of the cattle.”\textsuperscript{69} He might have been involved with other workmen, individuals, and institutions in the construction of Hatshepsut’s temple.\textsuperscript{70}

L. 2, ٣٩٣٩٣٩٣٩, Nb-sny

cf. ostracon no. 518, col. 2, l. 3.

\textsuperscript{66} Megally 1971, pl. XLVII, k. \hspace{1cm} \textsuperscript{68} Megally 1971, pl. XX, e.
\textsuperscript{67} Megally 1971, pl. XL, c. \hspace{1cm} \textsuperscript{69} Hayes 1960, pl. X, 9 rt. 9.
\textsuperscript{70} Hayes 1960, p. 34.
L. 3. ḥmn, Qn-Ỉmn
Sometimes, this name is inscribed in another variant ḥmn-qn. This individual is mentioned as a mason on an ostracon from Deir el-Bahri dating to year 49 of Tuthmosis III. The same name is written on an ostracon dated to the 18th Dynasty, and recording a message sent from him to the workman Hry-ms, discussing about masons. Qn-Ỉmn is mentioned on another ostracon from the tomb of Senmut without any titles, in addition to a hieratic ostracon from Deir el-Bahri, where he is referred to as Qn-Ỉmn of thsw (?). Following what is mentioned above, one could identify him with the mason who appears on the ostracon of Deir el-Bahri that dated back to the year 49 of Tuthmosis III.

L. 4. ṣḥḥ, Sbk-ms […]
As far as I know, this name is not attested among the persons discussed on the 18th Dynasty ostraca of Hatshepsut and Tuthmosis III.

L. 5. ṣḥḥ, ṣḥḥ, Pȝy
Most probably he could be identified with the mason mentioned on an ostracon found at Deir el-Bahri and dated to the 18th Dynasty.

O. Cairo DeB. No. 528 [PL. 4, FIG. II-12]
Description
Provenance: Deir el-Bahri
Dimensions: H. 9 cm; W. 7.5 cm
Material: Flint
Date: New Kingdom, 18th Dynasty
Current location: Egyptian Museum of Cairo

The text is written in black ink on one side only. The text is complete, and consists of three short lines. The handwriting is clear, neat, and readable in most of the text.

Some draughtsmen were mentioned on this ostracon such as Djehutynofer that were mentioned on the later ostracon. This ostracon belongs to the group of Mrs. Rasha Isaac.

It is worth noting that there are two draughtsmen with the same name as Djehutynofer that were mentioned on the later ostracon. This ostracon belongs to the group of Mrs. Rasha Isaac.
Hieroglyphic Transcription

This text is written in administrative handwriting, which belongs to the 18th Dynasty style, when the handwriting was thick and bold. The scribe is a professional and is familiar with writing the variations of the signs.

L. 3, a: This word is determined by two seated men. Normally, the determinative is a man and a woman. Perhaps, the scribe forgot to add the diacritic mark for the second sign.

L. 9, a: It is a much effaced sign that is very difficult to recognize. b: The upper part could represent ꞌm, however the lower sign is still illegible.

Commentary

This text contains information about the distribution of beer in wšm-vessels and enumerated the number of vessel for each workman.

L. 1. ḫtynšm

The wšm-vessel was generally employed as storage for beer,\(^\text{[78]}\) and later it was particularly used as a beer measurement.\(^\text{[79]}\) This vessel first appeared in the 18th Dynasty,\(^\text{[80]}\) in the form \(\text{ūšm}\).\(^\text{[81]}\) Then, throughout the New Kingdom, its regular writing was \(\text{ūšm}\) or \(\text{ūšm}\).\(^\text{[82]}\) With some exceptions like \(\text{ūšm}\).\(^\text{[83]}\) The regular determinative of wšm is a vessel without handle, but in later times, especially in the texts of the 25th Dynasty, the determinative is representing a situla with a movable handle.\(^\text{[84]}\) This kind of vessel was a high-walled vessel with a neck and a wide opening,\(^\text{[85]}\) generally made of metal (silver or bronze).\(^\text{[86]}\) However, in some cases it was made of gold.\(^\text{[87]}\) J. Janssen mentioned that the wšm is quite small which agrees with its price. A clear price of bronze wšm is dated to the late 19th Dynasty, when its value equalled two deben, so J. Janssen concluded that while its exact value is uncertain, it remains fairly low.\(^\text{[88]}\)

L. 2. ḫtynšm

Hṛ.tyw-nṯr is the complete form of the abbreviated title Hṛ.ty, which means “masons.”\(^\text{[90]}\) This title is a nisbe form of the old expression Hṛ.t-nṯr, “god’s underground” or “necropolis.”\(^\text{[91]}\) This title is attested since the Old Kingdom, where it generally indicated the tomb builders. From the 18th Dynasty onwards, it has a specific meaning in which it referred only to the workmen who had the responsibility of cutting the stone and digging the royal tomb, which was hewn from solid rock.\(^\text{[92]}\) J. Černý considered Hṛ.tyw-nṯr as a rare title, because it was not

mentioned frequently on the ostraca of Deir el-Medina. M. Megally justified this rarity for the type of documents, which recorded Hr. ty-nṯr in Deir el-Medina. Hr. tyw-nṯr is mainly written on reports on papyrus, but not on ordinary daily-life ostraca. Furthermore, this rarity may have resulted from the fact that masons were considered in general as workmen among the crew of the tomb builders. So they were described in the documents as rmt-ỉst, and when they had a specific mission related only to them or had rations and rewards, they were described as Hr. ty-nṯr. Perhaps, this is the reason why they are not frequently attested.

Duties of the masons in the New Kingdom

The gang of workmen included masons, carpenters, chief carpenters, sculptors, and draughtsmen. Each one of them was specialized in a certain phase of the creation of the royal tomb. The role of the masons was starting once the site was chosen and when the plan was drawn up. They were cutting the royal tomb out of the solid rock. Although, the main duty of the masons was to establish the royal tomb, some of them worked on the buildings in the temples of Luxor, Karnak and in the southern city during the Ramesside period.

As J. Černý mentionned, this specification in the southern city, or even more precisely at Karnak and Luxor, suggests that sometimes during the long reign of Ramesses II when his tomb was finished, the workmen were commandeered to the vast constructions of the king on the east bank. That is why one can find more than one mason during the reign of Ramesses II adopting the title Hr. ty-nṯr, among the other “servants in the place of truth.” Another possibility is that they were sent to quarry stones for the construction of the Theban sanctuaries in the sandstone-quarries at Gebel Silsila. M. Bierbrier added that the talent of the workmen could be used for the benefit of other members of the royal family and it is certain that the craftsmen were employed to construct the highly decorated tombs of the royal wives and princes in the Valley of the Queens, such as the famous tomb of queen Nefertari, wife of Ramesses II. This fact can also be applied to the masons.

Number of the masons

On one hand the number of masons among the crew was not stable. The variation in their numbers relates to the progress of the work in the royal tomb. The larger numbers meant that the work was beginning. On the other hand the small number indicates that the royal tomb had been completed or on its way of being completed so fewer workmen were required. In the field of work, the masons were under the authority of the vizier; this is referred to on an ostracan dated to King Tuthmosis III, when the masons worked under the direction of the vizier Rekhmere. According to a hieratic ostracan dated to the 18th Dynasty, the masons were put under the direct control of the ḫnḫb, “chief of masons.”

\textbf{Commentary}

This ostracon could be a necropolis journal. This kind of journal records the details of the daily work in the royal necropolis, such as the progress of the work in the royal tomb, the numbers of labourers, and their presence or absence. Usually the scribes used headings at the beginning to introduce such texts. However, the scribe of the present ostracon didn’t pay attention to recording the date and didn’t use any heading line, as well as not being interested in writing any notes in red.\textsuperscript{113} Presumably, most documents of this kind were considered temporary records, and would be recopied as permanent registers on papyrus.

\textsuperscript{110} Megally 1971, pl. VI, b.
\textsuperscript{111} Hayes 1960, pl. XIII, no. 63 rt.; pl. XIV, no. 67.
\textsuperscript{112} Megally 1981, pl. XXXVI. As for the point to be added over the head of the bird, it is attested for the first time during the Middle Kingdom, in P. Brooklyn no. 351446, and continued to be in use until the beginning of the 18th Dynasty. The first example of this point during the 18th Dynasty is dated to Queen Hatshepsut, and it was also found on an ostracon uncovered in the tomb of Senmut. Megally 1981, p. 295.
\textsuperscript{113} Megally 1981, p. 298.
The information about absence from or presence at work in the royal tombs is often included in the necropolis journal. The phrase under discussion perhaps has three meanings: the first one could that the masons were already absent from work that day; the second could that they had already attended to their work that day, but didn’t participate with their group of masons in a certain task; and the last one could that they attended the work but had another mission to be carried out.

This name is written in variant forms. Maybe this individual can be identified with the mason who occurs on an ostracon dated to year 49 of Tuthmosis III at Deir el-Bahri, in the form of. Perhaps he is also the same person who is mentioned on an ostracon from Deir el-Medina dated to the 18th Dynasty among other workmen.

It is clear that this is a Nubian name. It is usual to find foreigners among the Egyptian workmen, e.g. a Nubian mason is attested on an ostracon found at Deir el-Bahri.

Limestone ostracon inscribed in black ink on one side only. The text is composed of four incomplete lines as the ostracon is broken at the bottom. The handwriting of this text is big with bold ink.

Hieroglyphic transcription

Palaeographical Remarks
L. 1-2. Traces of ink could be seen at the end of the first line and the beginning of the second line. Most probably the scribe erased a mistake.

L. 2.a. It could represent .

L. 4.a. Perhaps stands for the repeating sign for the above word dnỉ.t.

Transliteration
[1] ḫȝm.w n pȝ
[2] Ṝr-ʿȝ wdn ḫȝr 1
[3] ʿq.w dnỉ(.t) [1] […]

Translation:
[1] Yamou to the
[2] Royal Palace (i.e. Great House), wdnt-bread: 1 khar.
[3] Bread: dint-basket 1 […]

Commentary
Presumably this text is a list of contributions from the official Yamou to the Royal Palace. This sort of supplies for temples and palaces has been known before. It has been noted that most of the supplies that were offered by officials on the ostraca of Deir el-Bahri were kinds of baked products. In addition they were in small amount.
L. 1. $\bar{\text{y}}\text{m.w}$, Ṭm.w\textsuperscript{124}

The official Yamou was known as an overseer of the Treasury at the time of Amenophis I.\textsuperscript{125} However, it is not certain whether the Yamou of the present text is the same man of the time of Amenophis I and still live in the time of Hatshepsut and Tuthmosis III.

L. 2. $\bar{\text{y}}\text{m.w}$, Pr-\textsuperscript{126}

It seems that, in this case, this term points to the royal palace rather than the pharaoh. Pr-\textsuperscript{126} is mentioned in a list of supplies presented for the preparation or upkeep of the tomb of Senmut. However, it was written in the form $\bar{\text{y}}\text{m.w}$, adding the sign $\text{r}$ as determinative.\textsuperscript{126}

O. Cairo DeB. No. 448

Description

Provenance: Deir el-Bahri
Dimensions: H. 12 cm; W. 7.5 cm
Material: Potsherid
Date: New Kingdom, 18th Dynasty
Current location: Egyptian Museum of Cairo

The ostron is inscribed in black ink on both sides. The recto is written in nine lines, including the heading on the first two lines. The text is complete; however the ink is frequently faint in some parts. The verso, which consists of eleven lines, is incomplete. Most of the signs are wiped out especially in the first seven lines; furthermore, the last line is completely erased.

\textsuperscript{125} Helck 1958-1975, pp. 345, 466. It is worth noting that this name is entered as apart in the name of the official Ṭm.w-wntḥ in the time of Tuthmosis III. Navrátilová 2007, p. 32.
\textsuperscript{126} Hayes 1960, pl. XI, no. 14 tr. Hayes in the two cases translated it as “Pharaoh”, p. 41.
Palaeographical Remarks

It seems that the text on both the recto and verso was written by the same scribe. The inscriptions represent the characteristics of the 18th Dynasty handwriting, most probably from the time of Hatshepsut and Tuthmosis III.

Recto
L. 4. a. \[\text{It stands for} \] , which occurred also on the verso in lines 2, 6, and 9. This writing as seen in the following table is far from its ordinary shape, and is very close to the sign \[\text{:} \]

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Möller 1927b, 383</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The writing technique of this sign \[\text{:} \] is different from the sign \[\text{.} \]. However, it seems that the scribe was confused here between the two signs. Any parallels for this sign dating back to the time of Hatshepsut and Tuthmosis III are uncertain.
L. 7. a. The second part of this line escapes me.
L. 8. a. I am not confident in my reading for this group as \[\text{ds} \], because the sign is written here in an odd form, and the whole word is written in an uncommon arrangement.

Verso
L. 1. a. Faint traces probably refer to a name.
L. 3. a. This line is very faint. However, based on the visible traces, one could read the first and the last group, while the middle group is difficult to understand.
L. 5. a. The last three signs could be restored as \[\text{Inn.} \]
L. 8. a. \[\text{It could represent the sign} \] , where it is written in the form of middle hieratic.\[\text{127} \]
L. 11. a. The whole line is wiped except for a few traces at the very end that could be part of a number.

\[\text{127 Möller 1927a, 467.}\]

Commentary

The recto contains a list of supplies presented by the temple of Tuthmosis II to Hatshepsut’s temple at Deir el-Bahri. The verso contains supplies and offerings from the officials of Hatshepsut to her temple as well.

Recto

L. 1. \(\text{Iny}(t)\)

For this verb refers to movements, it was highly used by the administrative vocabulary and, as such, in delivery account formulae.
The temple of Tuthmosis II, which is located to the north of Medinet Habu,128 was called $S.p.t\cdot\cdot\cdot nh$ or $Hu.t\cdot\cdot\cdot nh$,129 “Chapel of life.”130 This ostracon clarified the economic role that was played by temples throughout the New Kingdom. Through the 18th Dynasty documents, as well as in the Ramesside Period inscriptions, it has been revealed that the temple was a self-sufficient economic unit,131 powerful enough to meet its own requirements and contribute to the offering-cult in the great temple of Amon at Karnak. In addition to its support to other institutions like the community of workmen at Deir el-Medina,132 it also supported other temples under construction. It is worth noting that the temple was considered to be a kind of economic organization that contained a productive workshop called $sn'$, which was responsible for the production of their requirements.133

The total number of names of bread that occurred throughout the New Kingdom texts was about 97, of which almost 50 are attested for the first time while the others are known from earlier periods.134 The loaves varied in size, shape (oval, round, conical), decoration, and also had special flavours.135 The word $t$ refers to bread in general,136 while sometimes it was preceded by adjectives – more than 20 – forming new types of bread. Sometimes these names of bread describe their shape, size, colour or their ingredient, e.g. $t\cdot\cdot\cdot$ “great bread”; $t\cdot nfr$, “good bread”; $t\cdot hqd$, “white bread”; $t\cdot n\cdot ft$, “barley bread.”137 Probably the very uncommon name $t\cdot umt$, that means “thick bread”138 is used to describe the size or the shape of the bread. Presumably, this thick-bread is similar to the well-known bread called “Eish ash-Shams” and still eaten in Upper Egypt.

This term occurs on some ostraca from Deir el-Bahri precinct, relating to the Djeser-Djeserou and its builders.139 This word is written in several forms,140,141,142,143 Maybe, the name refers to the typical offering bread.144 The shape of this loaf is uncertain; perhaps it was a small object, probably a roll rather than a loaf.145

140 Hayes 1960, pl. X, no. 10.
141 Hayes 1960, pl. XI, no. 9 rt.
143 Wh I, 391-1.
L. 5. 𓊦, Šʿy.t
This kind of cake was one of the most important and popular foods mentioned through the ancient Egyptian texts. The word Šʿy.t is attested for the first time in the tomb of Khâbausoker at Saqqara (3rd Dynasty, Old Kingdom), and continued to be used until the end of the New Kingdom. It was a regular type of delivery by the memorial temple where it occurs among the daily and festival offerings together with grain products. This cake was made of emmer, mixed with fat and honey, it was thus an expensive product.

L. 5. 𓊭, srf
Adjective meaning “warm.” When it comes with cake, it could simply mean “fresh cake.”

L. 6. 𓊫, ḏqr.w
Fruits were an important part of the ancient Egyptian diet along with the cereal products, and vegetables. The word ḏqr.w, “fruits,” is attested for the first time in New Kingdom texts.

Verso
The verso probably contains an offering list of four officials to Hatshepsut’s temple. This kind of private donation (concentrated mainly on bread) to this temple was known before and occurs on an ostraca uncovered inside the temple itself. According to W. Hayes, the foregoing list would be recopied onto a permanent register, e.g. papyrus, and duplicated in the temple records. At the same time, it is an indication that the temple was operating and receiving offerings from Hatshepsut’s officials and their families.

L. 8. 𓊭, Grgṣk pr
As far as I know this individual is not known in the 18th Dynasty texts, especially in those of Hatshepsut and Tuthmosis III.

Description

Provenance: Deir el-Bahri
Dimensions: H. 9.5 cm; W. 9 cm
Material: Limestone
Date: New Kingdom, 18th Dynasty
Current location: Egyptian Museum of Cairo

154 Hayes 1960, p. 37.
155 Hayes 1960, p. 37.
The ostracon is inscribed in black ink on one side only. The text consists of five incomplete lines, because the ostracon is broken on the right side. The surface is in a bad state of preservation, so the ink is very faint in many parts of the text. The handwriting is regular, neat, and elegant.

Hieroglyphic Transliteration

[3] [...] House of the overseer of the treasures [...] 5
[4] [...] (?) of (Aâkeherenrô) that is 4
[5] [...] King of upper and lower Egypt (Aâkeherenrô), total 5 [...] 

Commentary

Due to the breakage, in addition to the faded parts, it is not possible to grasp the entire meaning. However, the subject is similar to other texts found at Deir el-Bahri dated to the 18th Dynasty. It could be a list recording contributions and supplies from various institutions, individuals, and towns to the construction of Hatshepsut’s temple,159 or at least to the preparation of Senmut’s tomb.160

L. 3. ỉmy-r ťtm, pr ỉmy-r ťtm

As far as I know, this term is used in one 18th Dynasty ostracon of Deir el-Bahri, with other officials, e.g. ỉmy-r pr ḥw, in a list of contributions to the temple of Hatshepsut.161 However, the title ỉmy-r ťtm, “Overseer of the treasure”, occurred many times in lists of supplies and contributions to the temple of Hatshepsut and in the tomb of Senmut as well.162 It has been noted that the highest amount of supplies in these lists belonged only to the overseer of the treasure.163

L. 5. ʿȝ-hpr-n-Rʿ

The royal name ʿȝ-hpr-n-Rʿ, “Tuthmosis II”, is almost not attested in Deir el-Bahri except in ostracon no. 448 (pl. 5, 6, fig. 17-20) of the current paper.

O. Cairo DeB. No. 482

Description

Provenance: Deir el-Bahri
Diameter: 9.5 cm
Base: 4.5 cm
Material: Pottery
Colour: Red
Date: New Kingdom, 18th Dynasty
Current location: Egyptian Museum of Cairo

A circular bowl inscribed in black ink on the convex side only. The text, incomplete, consists of four lines. The handwriting is elegant, and readable. However, some signs are faint; some

159 Hayes 1960, p. 34, pl. X, no. 6.
others are missing, especially in the first and third lines on the edge of the bowl. There are also some faint signs at the end of the third line that make it difficult to read.

Hieroglyphic Transliteration

Palaeographical Remarks
L. 3, a. At the end of this line, a few signs are faint and difficult to read. Possibly they relate to the scribe Djehwty-Tety or it may also give the reason why his amount of barely is less than that of the scribe Hori.

L. 4, a. Abbreviated and unusual writing for the name Hor(i).164 There are no details at all except the two legs. It is worth noting that the name is written without any determinative.

Transliteration

Translation

[1] The third month, Akhet season, day 19
[2] Amount of barley which is delivered (distributed) (to)
[4] Scribe Hor(i): barley 64

Commentary
The text records a distribution of barley for two scribes, as it presents their names accompanied with their shares of barley.

L. 3. Ḑḥwty-Tty, Ḑḥwty-Tty
As far as I know, this name was not known before in the text of Deir el-Bahri.

164 Compare the similar writing of the falcon as a part of the name (Ḥr-nfr), cf. Grandet 2010, no. 10125.
L. 4. ḫr(i)

Maybe this name is identified with the scribe Hori who is attested on an ostracon from the tomb of Senmut.\textsuperscript{165} He is also mentioned on an ostracon found in Gurna dated to the 18th Dynasty together with the workman \textit{Ìmn-nb}.\textsuperscript{166}

Commentary

Presumably this text is a list with the number of workmen assigned to special missions or duty. Unfortunately, the text did not provide enough information about the nature of this work. However, the numbers before the entries could indicate the number of men involved in the work. In addition, at the end of the text, the whole workforce of about 40 men was calculated by the scribe. It is worth noting that some expressions of the present ostracon were not in common use in the published texts dated to the 18th Dynasty, especially those of Deir el-Bahri.

Recto

L. 1. [1] \text{ sfḥ pȝ ḫȝ } 167
This expression is different from the known \text{ sfḥ n ḫȝ }, “used tool”. Most probably the meaning here is “removing the hall”. Maybe the text refers to a process of removing a construction by this large number of workmen.

L. 2. \text{ sšm }
Perhaps refers to the leader of the team or at least the leader of his group. However, this title was not in common use through the texts of the 18th Dynasty with this specific meaning.

\text{ nb-ỉr(y) }
This name could be a variant of the name Nebiry, who occurred on two 18th Dynasty ostraca dated to the time of Hatshepsut and Tuthmosis III. 168

L. 3. \text{ nȝ n ḫȝy.w }
This term means “measurers”, 169 and could refer to the people who measure the lands before the construction or during the work.

---

167 According to the Berlin Dictionary, the word ḫȝ that is determined by [1] means “hall” Wb III, 221-18. So that it could refer to “building” rather than “tool or chisel”.

168 Černý 1935; Černý, Gardiner 1957, pl. XX, 5.

Verso

L. 1. 𓊨 𓊪 𓊬 𓊨, Snfr
He could be identified with the individual Senofer (cf. ostracon, 407, l. 4 rt., pl. 2). It is worth noting that the writing of this name is different from any other known form of the name: it is written $\text{𓊧} + \text{𓊨}$ instead of the sign $\text{𓊧}$.\(^{170}\)

L. 2. 𓊨 𓊪 𓊬 𓊨, pꜣ 𓊪 n ḫw
The text refers to five men who were assigned to the storehouse of the bread. Maybe this storehouse is located in the royal palace or somewhere in the temple.

O. Cairo DeB. No. 434

Description

Commentary

L. 2. ⲁ ⲑ ḳ 𓅓, Sȝ.w 172

As far as I know, this word is not mentioned in the texts of the first half of the 18th Dynasty. It is worth noting that this name and the word ḳrt, which belongs to a kind of plant, don’t have determinatives in contrast with the other names.

L. 4. Ⲝ ⲝ Ⲡ ⲁ, Sn-mn 173

This name could be identified with the workman Senmenou, who occurs on an ostracon from the tomb of Senmut. He is mentioned with other workmen such as Mḥ and Wȝr-hȝ.t. 174 Presumably, this individual could be considered as Senmut’s brother. 175

L. 6. 𓊲𓊠𓊓𓊖, ḳḥ

The meaning of this word is problematic.

171 Maybe translated as “Amen among his servants”.
173 Ranke, PN I, p. 308-22.
174 Hayes 1960, pl. XVII, no. 85.
