EXPLANATORY PARTICLES \bar{n} AND $\bar{n}G1 : \bar{n}.x \in$

In demotic this particle takes the form ; e. g.

te-tn m-s p-e-tn mr n.'m-n n p s 2 ⁽¹⁾ “you have a claim upon anyone you please of us, both”, where *p s 2* (ΠΕCΝΛΥ) “both, lit. the 2 persons” defines *n* “us” in *n.'m-n*.

and 

p rm nt e-f a st-f n-t pe-f 'r n.'m-n n t he-t 2-t ⁽²⁾ “the one who withdraws from the other of us, the 2 (contracting) parties”, where *t he-t 2-t* “the 2 parties” defines the suffix pron. 1st. pers. plur. *n* in *n.'m-n*.

and 

n wpty-w n n w'b-w n Wpwy ⁽³⁾ “the judges, the priests of Ophois”, where *n w'b-w n Wpwy* “the priests of Ophois” defines *n wpty-w* “the judges”.

and 

Twt s P-te-'Tm n pe hy ⁽⁴⁾ “T. son of P. my husband”, where *pe hy* “my husband” defines or determines “T. son of P.”

In Coptic the particle takes the form ñ, ⲙ before initial ⲙ, ⲡ (ϕ, ψ); e. g.

ⲁⲩⲧⲱⲟⲩⲛ ⲁⲉ ⲙⲡⲉⲐⲛⲁⲩⲩ ⁽⁵⁾ “then both arose”, lit. “they arose, namely the two persons”, where ΠΕCΝΛΥ defines the pronominal suffix Υ (= ΟΥ) in ⲁⲩⲧⲱⲟⲩⲛ; and ⲛⲧⲉⲣⲟⲩϥⲱⲟⲩⲥ ⲙⲙⲛⲧⲥⲛⲟⲟⲩϥ ⲛⲉⲡⲓⲕⲣⲟⲡⲟⲥ ⁽⁶⁾ “when they assembled, namely 12 bishops” i. e. “when 12 bishops gathered”,

⁽¹⁾ SETHE, *Demotische Bürgschaftsurkunden*, 1, 17-18.

⁽²⁾ *Ibid.*, 9, 22.

⁽³⁾ THOMPSON, *Family Archive from Siut*, B. I, 1-2, 7; II, 13-14; X, 16.

⁽⁴⁾ *Ibid.*, IV, 4-5. For other instances see glossary No. 157.

⁽⁵⁾ ZOEGA, 346.

⁽⁶⁾ ZOEGA, 348.

where $\text{m}\bar{\eta}\tau\epsilon\kappa\text{no}\bar{o}\gamma\varsigma$ $\bar{\eta}\epsilon\pi\iota\kappa\kappa\omicron\pi\omicron\varsigma$ “12 bishops” determines the 3rd pers. plur. in $\bar{\eta}\tau\epsilon\rho\omicron\gamma$ –; and $\text{m}\bar{\eta}$ $\bar{\mu}\pi\epsilon\text{n}\lambda\gamma$ $\epsilon\rho\omicron\omicron\gamma$ $\bar{\mu}\pi\epsilon\kappa\text{n}\lambda\gamma$ ⁽¹⁾ “hast thou not seen both?” lit. “hast thou not seen them, namely the two persons?”, where $\pi\epsilon\kappa\text{n}\lambda\gamma$ defines the 3rd pers. plur. in $\epsilon\rho\omicron\omicron\gamma$; and $\lambda\text{n}\omicron\kappa$ $\Delta\epsilon$ $\lambda\iota\chi\omega$ $\epsilon\rho\omicron\omicron\gamma$ $\bar{\eta}\text{n}\epsilon\text{n}\tau\lambda\gamma\varsigma\omega\lambda\bar{\eta}$ $\text{n}\lambda\bar{\iota}$ $\epsilon\beta\omicron\lambda$ ⁽²⁾ “I then described what was revealed to me” lit. “I then spoke concerning them, namely the things which were revealed to me”, where $\text{n}\epsilon\text{n}\tau\lambda\gamma\varsigma\omega\lambda\bar{\eta}$ $\text{n}\lambda\bar{\iota}$ $\epsilon\beta\omicron\lambda$ “that which was revealed to me” defines the 3rd pers. pl. in $\epsilon\rho\omicron\omicron\gamma$.

Other examples are like $\theta\lambda\alpha\rho\alpha\tau\varsigma$ $\bar{\eta}\omicron\gamma\beta\omega$ “under a tree”, lit. “at the foot of it, namely a tree”; $\rho\omega\omicron\gamma$ $\text{n}\eta\iota\alpha\varsigma\epsilon\beta\eta\varsigma$ “the mouths of the impious” lit. “the mouth of them, namely the unrighteous”, etc. etc.

The word introduced by $\bar{\eta}$ could also define a preceding independent pronoun as in the following examples :

$\lambda\text{n}\alpha\kappa$ $\text{n}\pi\alpha\pi\alpha$ $\epsilon\iota\varsigma\iota\tau\rho\omicron\gamma$, $\lambda\text{n}\alpha\kappa$ $\text{n}\kappa\alpha\varsigma\epsilon\text{m}$ etc. (joint authors) and $\text{n}\tau\omicron\gamma$ $\text{n}\pi\alpha\lambda\omega\text{m}$ ⁽³⁾.

If the defining word is a pronoun, this latter is the independent pronoun : $\lambda\text{n}\mu\omega\iota$ $\text{n}\epsilon\text{m}\lambda\gamma$ $\lambda\text{n}\omicron\kappa$ $\text{n}\epsilon\text{m}$ $\kappa\epsilon\kappa\text{n}\lambda\gamma$ ⁽⁴⁾ “we walked with him, I and two others”. Independent pronouns are etymologically related to the particle $\bar{\eta}$ and they were not infrequently used in the language parallel to $\bar{\eta}$ + noun.

Sometimes this explanatory particle $\bar{\eta}$ is omitted; e.g. $\epsilon\gamma\tau\omega\text{n}$ $\rho\omicron\gamma\gamma\lambda\bar{\iota}$ ⁽⁵⁾ “where is thy husband?” lit. “where is he, thy husband?” Compare the absence of $\bar{\eta}$ in Late Egyptian, referred to above.

Sometimes this particle n (variant m) is followed in demotic by the enclitic particle ge (old $\bar{\sigma}$ -) as is the case in

$\text{h}\bar{\eta}\text{b}\bar{\eta}\text{q}\bar{\epsilon}$ $\text{n}'\text{m}$ -s n -ge $\text{'y}\bar{\eta}$ $\bar{\iota}$ n $\text{t}\bar{\eta}$ -s $\text{q}\bar{\iota}$ -t m -ge $\text{r}\bar{\text{m}}$ $\text{'m}\bar{\text{n}}\bar{\text{t}}$ ⁽⁶⁾ “waste her away, thou demon; take her sleep, thou man of Amenti”, where the first n -ge introduces

⁽¹⁾ ZOEGA, 397.

⁽²⁾ ZOEGA, 397.

⁽³⁾ CRUM, *Coptic Dict.*, p. 215 b, sub n -, I, d.

⁽⁴⁾ MALLON, *Grammaire*, § 350, last example.

⁽⁵⁾ ZOEGA, 346.

⁽⁶⁾ GRIFFITH-THOMPSON, *Mag. Pap.*, verso 13/2.

yh “demon” and the second *m-ge* introduces *rm ’mnt* “man of Amenti” as nouns defining the pronoun “thou” implicit in the imperatives *hbqe* “waste away” and *t* “take” respectively. Compare  subject, *Wb* V, p. 178, 10.

The group \mathfrak{H} is false for $\mathfrak{Z}(\underline{\infty})$. Palaeographically speaking, it is properly the group for \mathfrak{H}^{sp-2} "twice", which is not infrequently confused by the scribes with that of $\underline{\infty}$.

While this example is almost the only one in the extant demotic texts for the use of the explanatory particle *n* followed by *ge*, examples for the use of its Coptic form ⲛⲉⲓ : ⲛⲉⲙ are very common.

Its chief use is to introduce a noun to define a preceding suffix pronoun used as subject e. g. $\lambda\alpha\chi\omicron\omicron\omicron \bar{\eta}\varsigma\iota \omicron\Upsilon\acute{2}\lambda\lambda\omicron$ "an elder said" lit. "said he, namely an elder".

ΠΕΧΛΑΥ ΔΕ ΝΑΥ ΝῆΙ ΠΡΟ “the king said to him” lit. “then said he, namely the king, to him”, etc. etc.

We have already seen that simple \bar{n} had this same use in such examples as $\lambda\gamma\tau\omega\omicron\upsilon\eta\varsigma \ \Delta\epsilon \ \bar{\eta}\pi\epsilon\varsigma\kappa\eta\lambda\gamma$ and $\bar{\eta}\tau\epsilon\rho\omicron\upsilon\varsigma\omega\omicron\upsilon\varsigma \ \bar{\eta}\mu\bar{\eta}\tau\varsigma\eta\omicron\omicron\upsilon\varsigma \ \bar{\eta}\epsilon\pi\iota\varsigma\kappa\omicron\pi\omicron\varsigma$ quoted above.

$\bar{n}\sigma i : \bar{n}\alpha e$ could also be used in places where simple \bar{n} is normally used e.g.⁽¹⁾.

†CΩTM EP04 N6I IΩZANNHC, where IΩZANNHC defines 4 in EP04; and ΛITHITOY NXE NEΩHPH EPΦOYEI, where NEΩHPH defines OY in ΛITHITOY; and NAI NTAYΩN2ICE N2HTOY... N6I NCA2, where NCA2 defines OY in N2HTOY.

As to the example ΘΗΕΤΑΥΟΥΩΡΠ ΩΑΡΟΣ ΝΧΕ ΓΑΒΡΙΗΛ, quoted by CRUM, *ibid.*, I cannot give an explanation except, perhaps, that ΕΤΑΥΟΥΩΡΠ is written in error for ΕΤΑΥΟΥΩΡΠϞ.

(1) CRUM, *Coptic Dict.*, p. 252, sub ΝΓΙ *ad fin.*
