Two Nabataean Ostraca from Egypt

Christopher TOLL *

THE INSCRIPTIONS on the two ostraca published below are Nabataean and consist mainly of numerals.¹ The ostraca were found during the excavation at Wakâlat al-Zarqâ (in antiquity *Maximianon*) near the Red Sea coast, 65 km. from Quseir.² The ostraca are attributed to the 2nd century A.D.

What makes the inscriptions interesting and at the same time difficult to interpret is that they are the only ones of their kind known so far, other Nabataean inscriptions from Egypt, also from the 2nd century A.D., being graffiti containing mostly caravaneers' greetings of the formula "Hail! NN son of NN".³ Since the potsherds have been found at the coast and it is known that the Nabataeans traded with Egypt⁴ they could be supposed to be some kind of unloading records in which only the figures were necessary, the goods being known by the recorder. But that interpretation does not explain the two columns of figures in numerical order. A study of Nabataean inscriptions on potsherds from other parts of the Near East (if any are known – among the published Nabataean inscriptions I have found only tomb and votive inscriptions beside graffiti) might solve the question.

* Carsten Niebuhr Institute, Copenhagen.

1 The facsimiles were made by Jean-Luc Fournet, the photographs by J.-Fr. Gout (both IFAO). The ostraca were brought to my attention by A. Bülow-Jacobsen.

2 For more information about the excavation, see N. GRIMAL, « Travaux de l'Institut français d'archéologie orientale en 1993-1994 », in this volume p. 420-423 and, also in this volume, A. BÜLOW-

JACOBSEN, Hélène CUVIGNY and J.-L. FOURNET « The Identification of Myos Hormos: New Papyrological Evidence ».

8 × 7 cm.

II A.D.

Fragment of a jar. Light coloured ceramic with pitch on the inside. Eight lines, the left part is lacking, leaving ca 8 signs in the first line and only one sign in the bottom line. The first line seems to contain two or three letters, whereas the rest of the inscription consists of numerals. Of these 1-10, in two columns (1-7 and 8-?) are well known,⁵ the sign for 20, however, being more like the letter ' (alef) but a similar sign in a graffito from Egypt A.D. 260 is read by Littmann (No. 46a) as '20' and its repetition in this inscription and its place after '10' in the second column line 6 speaks for its being '20'.

1. ? ? ? 20(+)20(+)20(+)20 ? ...

2 × 2.5 cm.

II A.D.

Fragment of a jar. Light coloured ceramic with yellow slip. There is no pitch on the inside. Six lines, the right part is lacking, leaving one sign in the first line and only four signs in the bottom line. The last two lines seem to contain the three letters ' s d followed by '8'. Strangely enough the ' (alef) has its final form. The letters could be read as the Arabic name 'Asad', known from inscriptions in the form 'sdw, 'asadâ'.⁶
